

## Caution

- The probe is very sharp.  
Keep this product out of the reach of children.
- MultiProbe is only for 12V vehicle use.  
It can be damaged in 24V vehicle.

# Description (Front)

1~7 : Channel 1~Channel 7

8 : Power indicator lamp

9 : Alarming lamp for channel 6

A : Sound switch for channel 6

B : Power connecter

# Description (Back)

C : Probe sensitivity control switch for Channel 7

If you want to adjust the sensitivity, insert “C” with a pointed object (such as a toothpick or paper clip). Whenever you push “C”, it sounds beep. The number of beep changes depending on each level. It has up to 3 levels and the lamp blinks with beep sound. Normally, choose level 2.

# Description (Channel 7)

Slightly tighten channel 7 sensor probe when you plug it to MultiProbe.

Hard tightening may cause defects of the connector housing in MultiProbe.

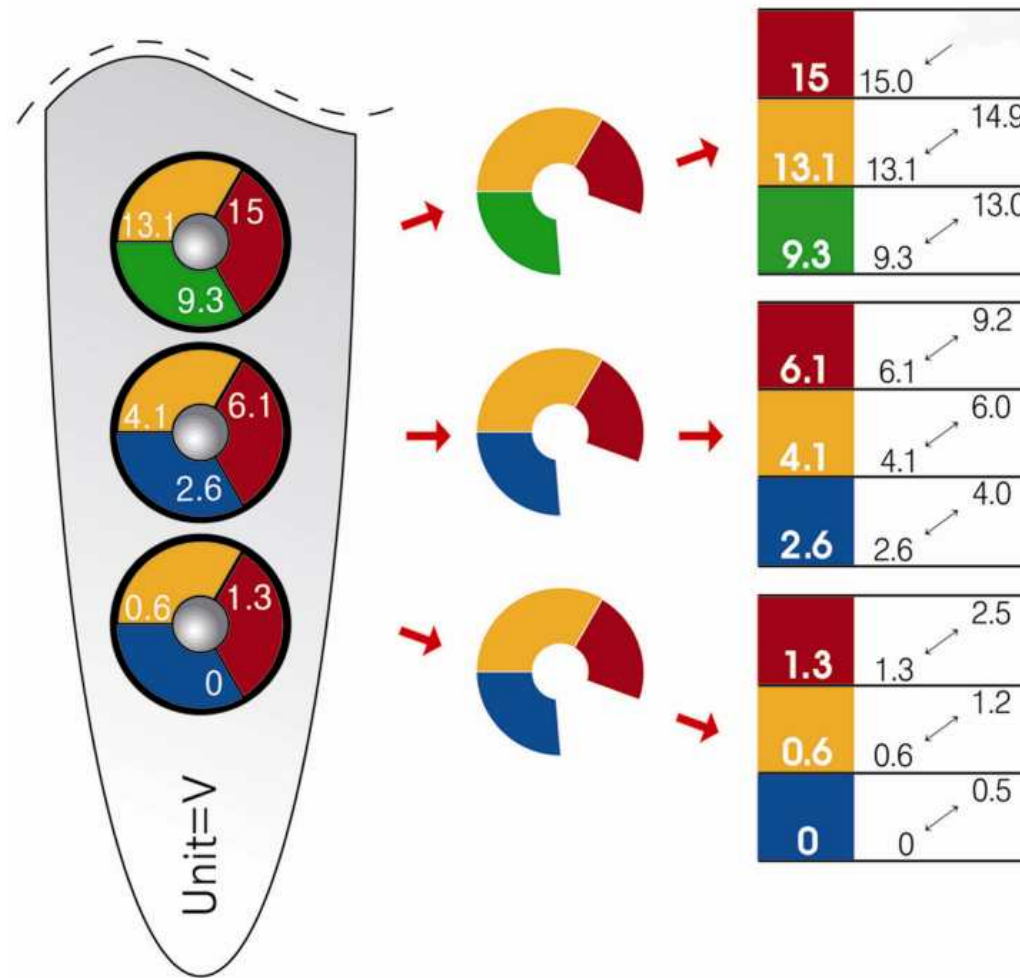

Don't forget to turn off channel 6 before using channel 7.

Channel 7 doesn't work simultaneously with channel 6.

You can find “▲” at the tip of sensor probe and just touch this point to the actuator.

# Channel 1 voltage mode

# Channel 2~6 voltage mode
