QianLuo ((Guagnan Sweater)) Factory

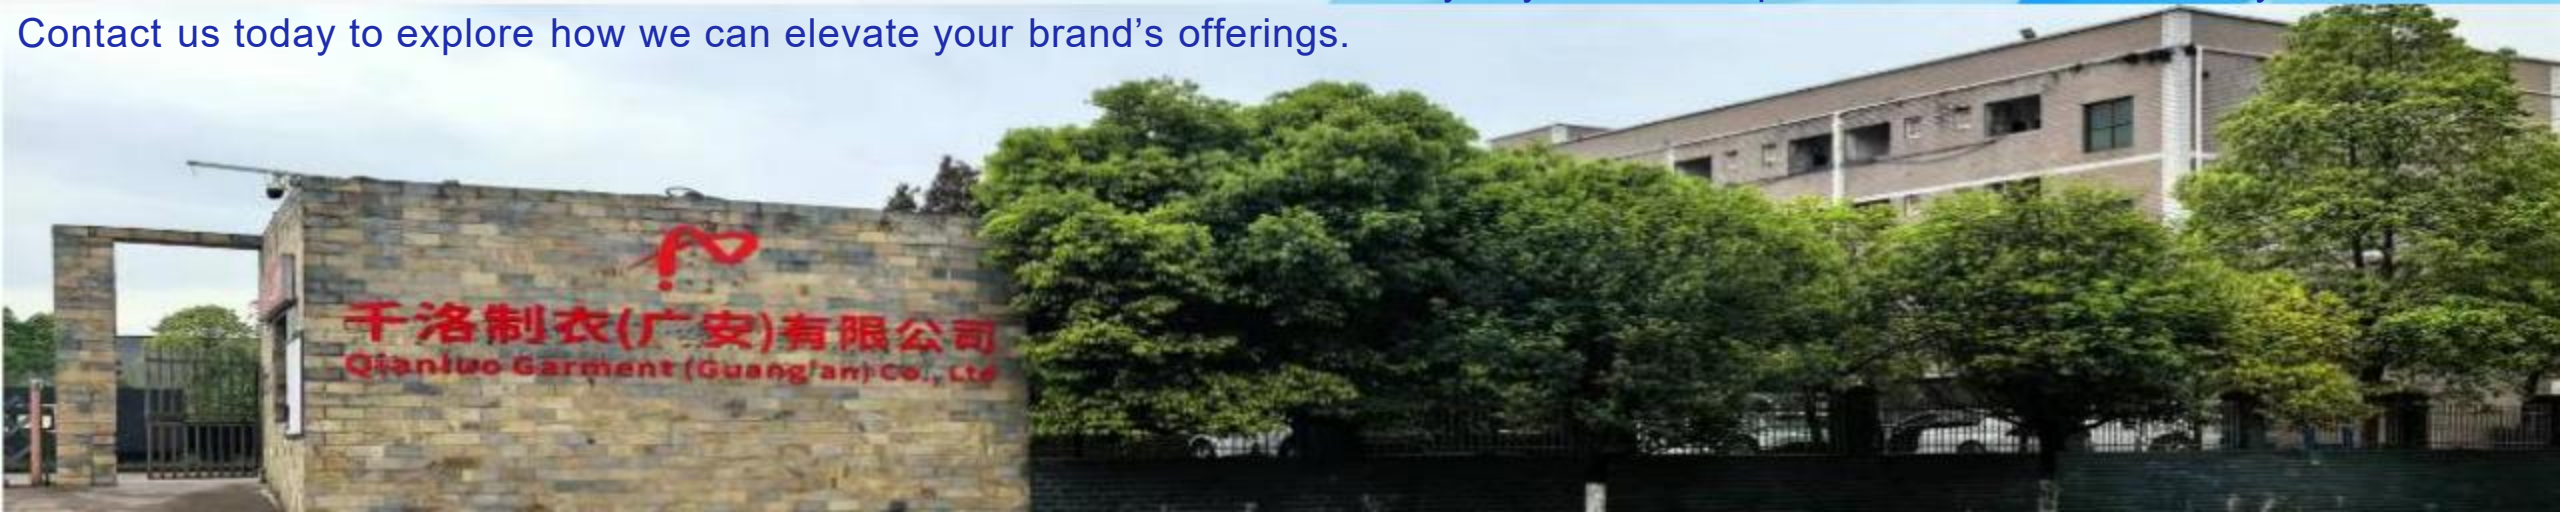

Gaunan Sweater Factory is loacated in Guangan city of Sichuan province China, its a leading manufacturer specializing in high-quality knitwear, combining precision craftsmanship with cost-effective solutions. Equipped over 200 advanced knitting machines, we excel in producing sweaters across a versatile range of gauges, including 7-gauge, 14-gauge, 16-gauge, and 18-gauge, to meet diverse design and functional needs—from chunky winter styles to lightweight, refined pieces.

Why Choose Us?

Superior Quality: Our sweaters are crafted with premium yarns and undergo rigorous quality checks at every stage, ensuring durability, softness, and consistent finishes.

Competitive Pricing: Leveraging state-of-the-art technology, bulk production capabilities, and streamlined processes, we deliver exceptional value without compromising on quality.

Customization: Tailor your designs with flexible gauge options, catering to both fashion-forward trends and practical requirements. Committed to innovation and customer satisfaction, Gaunan Sweater Factory is your trusted partner for affordable luxury in knitwear. Contact us today to explore how we can elevate your brand's offerings.

Quality Control

Raw materials

Inspect the quality and specifications of raw materials to ensure they meet the requirements, including yarn, fabrics, accessories, etc.

Inspect and sample the labels and hangtags to ensure they meet the brand client's requirements.

Production process

Supervise and inspect the technological processes, equipment maintenance, and operational standards in the production process to ensure the stability of quality during production.

Appearance and Size spec

Inspect the finished products for dimensions, appearance, and other aspects to ensure they meet the requirements and standards of the customers.

Label & Hantag

Final Inspection

Conduct spot checks and full inspections on each batch of products produced to ensure product quality and pass rate.

6 S Managment

Ensure that the production environment meets hygiene standards, complies with relevant laws and regulations.

Packing & Marking

Properly packing and mark the product to ensure its safety and hygienic use.
