The manufacturing of rubber-metal and rubber products for automotive industry

We specialise in the manufacture of rubber and metal-rubber products for automotive industry. Components which we manufacture are comply with the:

- quality
- safety
- low costs
- timeliness

requirements of this demanding sector. The products manufactured for our clients are fitted by them in components to be later used by globally-recognised companies.

With our support during the designing and planning of the production of new articles you will:

- gain an edge over your competitors,
- reach your goals sooner,
- be more responsive to market needs,
- save time.

Our motto:

- high quality,
- low prices,
- "just-in-time" deliveries,
- short deadlines for the launching of new products

We have ISO 9001 - Quality Management System and ISO 14001- Environmental Management System. We apply elements of QS 9000, VDA 6.1 and ISO/TS 16949 (PPAP, FMEA, SPC, APQP) during production process for automotive industry.

In cooperating with us, you are sure to receive a perfectly-tailored product, expert advice and a first-class service at all times. We believe that the trust and satisfaction we have gained so far from our clients allow us to offer the highest standard of cooperation.
