

ERBASIT®

BASIC MINERAL SALT MIXTURE WITH ESSENCE OF HERBS AS A NUTRITIONAL SUPPLEMENT WITH ESSENTIAL MINERALS

The Acid-Base Balance within your body

This Balance within your body is a pre-condition for good health. In modern times, scientific know-how tends towards the importance of the acidic environment in the body. Acidity is predominantly caused by unbalanced food intake, but also by the surrounding environment. In addition, physiological and psychological stresses and disorders disturb the acid-base balance in the body. The unbalance will sooner or later be manifested in the body: Over-acidity is always a cause of sediments. This can lead to listlessness, a feeling of unwellness and hamper your healthy lifestyle.

What does ERBASIT do for the body?

To achieve a proper balance, we recommend that you supplement your daily food intake with Biosana base-building mineral salt mixtures. ERBASIT will positively influence your acid-base balance.

What is ERBASIT?

This alkaline mineral salt mixture contains as its principal components the same minerals as those found in fruits and vegetables. They consist of citrate salts of calcium, potassium, sodium, magnesium, iron and manganese, as well as siliceous earth, herbs and inulin (oligofructose from chicory). The citrate salts are of plant origin, and are much more readily absorbed by the body than carbonate mineral salt mixtures.

Why do we need ERBASIT?

Minerals, like vitamins, belong to the essential nutrients which are vital to the preservation of life. Since the body cannot itself produce these nutrients, they have to be supplied through nourishing food and/or by supplementation. Resulting from the modern-day low consumption of fruit and vegetables, today's diet can be too low on minerals and is often excessively acidic. In this case, it is advisable to supplement the daily diet with ERBASIT to meet the mineral requirements of the body and positively influence the regulation of the acid-base equilibrium in the body. ERBASIT is sugar-free, protein-free, gluten-free, suitable for diabetics, and is prebiotic. ERBASIT is only of organic origin, made from all natural components. It contains no artificial flavours, preservatives nor colourants. Biosana ERBASIT has been produced using non-invasive production methods and sustainable harvesting. It has not been tested on animals, is free from animal ingredients and does not contain genetically modified substances.

For 40 years, the best for your acid-base balance.
Acid-base Neutrality for your Well-being.
100% Swiss - Produced with quality, ethics and conscience.
