DSP's cutting-edge technologies have opened a new world of human-centered “eco-friendly stainless steel.”

DSP manufactures metal plate that combines the functional side based on cutting-edge technologies like high vacuum and organic-inorganic hybrid coating with design, using the ‘Roll to Roll’ method to significantly increase productivity and economical efficiency.

We make constant efforts to offer our customers creative and innovative products. Our effort in production and research earns us a good reputation among our clients.

Organization

Vernox[®]

High-end Luxury Kitchen & Tableware Brand

Vernox is a compound word combining “green” and “stainless steel” in French, and it means “eco-friendly.”

As the name suggests, Vernox is a premium tableware brand that guarantees the safety of tables through stainless steel products and considers the health of all people by using an eco-friendly material.

Vernox started in 2019 with the philosophy of Germany's Bauhaus: “The shape follows the function.” We pursue the harmony of art and technology with minimal shape, clean color, and perfect surface treatment, with the effort to strive to put functionality into the simple beauty/reasonable design based on a special metal coating technique for 30 years.

The tableware that can be used with your loved ones worry-free, based on the principles of using reliable quality stainless steel materials and developing/producing them in Korea.

Meet Vernox products that always present something new, from the unique designs by in-house designers to the collaboration with various design teams.
