Let's refurbish to produce sustainably

Let's refurbish to produce sustainably

Let's refurbish to produce sustainably... Since 1991, Cofiem Electronics has been a leading European company in the distribution of refurbished industrial electronic parts.

Our Added Value

We offer you reliable, economical, and environmentally friendly replacement solutions for industrial electronic parts. Our goal is to keep your equipment operational sustainably and reduce downtime on your production lines.

COLLECT

We collect unused or worn industrial electronic equipment with the aim of reuse. After evaluation, the equipment is sorted according to its nature to be refurbished, used as spare parts, or recycled. This economic and ecological approach is part of a new logic of waste traceability.

—o Let's choose a more circular economy

REFURBISH

Parts are refurbished in France according to strict procedures under the RecQ label standards: testing, cleaning, replacement of worn or defective components, retesting, and quality control.

—o Let's choose premium quality for refurbished parts

REDISTRIBUTE

Packaged in reusable boxes, the refurbished parts are distributed throughout France and more than 50 countries worldwide with a 2-year warranty. In-stock products are shipped within 24 hours.

—o Let's adopt refurbishment for a new sustainable production

—o Let's refurbish to produce sustainably

Warranty **2** -year

Range of Refurbished Products

PLCs

Operator Panels

Drives
