STATEC BINDER GMBH

TRADITION

STATEC BINDER can look back on a long tradition. For more than 45 years, the experience in packaging technology of the company located in Gleisdorf (Austria) near Graz has been successfully applied worldwide. Thanks to continuous further development and optimization of proven technologies, STATEC BINDER has set itself at the top with new, innovative packaging concepts and is thus known as a leading supplier in high-performance packaging. The name STATEC BINDER stands for absolute reliability paired with precision.

AMONG OTHER THINGS, THE PACKAGING AND PALLETIZING SPECIALIST FROM AUSTRIA STANDS FOR ...

- ☑ High-performance packaging and palletizing of bulk materials
- ☑ highest quality machines and systems
- ☑ flexible and customer-oriented solutions
- ☑ absolute reliability, innovation and precision
- ☑ worldwide customer service
- ☑ more than 45 years of experience
- ☑ more than 1.800 installed machines worldwide

Josef Lorger
Managing Director

HOW IT ALL BEGAN...

The history of STATEC BINDER

1978

Within a very short time, the Styrian company has developed into a leading global player and specialist for packaging and palletizing systems. The high-quality machines are in high demand worldwide. For this reason, the growth curve for STATEC BINDER has been rising steeply in the last few years.

It all began with the first packaging line of Binder+Co AG in 1978 - the ABF/SPK. About two decades later, Statec Anlagen-technik was founded in Gleisdorf in 1999 and taken over by BT-Wolfgang Binder in 2006.

2008

On 31 October 2008, the foundations were laid for the success of the specialist for packaging and palletizing free-flowing bulk materials. Binder+Co AG and BT-Wolfgang Binder combined their expertise in packaging technology to form the joint venture STATEC BINDER.

2023

In 45 years, more than 1800 machines have been successfully installed on all seven continents and in more than 85 countries. Today, STATEC BINDER still benefits from the accumulated know-how and expertise of its parent companies. The product portfolio consisting of bagging systems for 5 kg to 50 kg bags, palletizers and big bag filling stations has been continuously expanded over the years.

STATEC BINDER

LOCATION

In order to be able to continue to handle the growing business efficiently and successfully, the modernization of the office building and the expansion of the assembly hall combined STATEC BINDER's know-how at one location. In addition to the modern architecture of the entire office complex, the office in Gleisdorf offers cost-efficient rooms that are equipped to the highest standards. The location also offers sufficient parking spaces for employees and visitors and creates space for internal and international exchange about customer projects and possible innovations.

To ensure that operational safety and high standards are also met, a sophisticated security system for the buildings as well as for the premises has also been integrated. The bagging lines and palletizing systems are assembled and tested for customers on 5,000 square meters. The existing assembly hall has been doubled in size in recent years - turning 2,500 square meters into 5,000. This has also significantly increased the assembly capacity. In addition, 19 additional office workplaces are located in the annex as well as the warehouse with the dispatch of spare parts.

GUIDING PRINCIPLES

VISION

We actively shape the future of packaging and palletizing technology.

MISSION

As an innovative provider of intelligent packaging and palletizing systems, our mission is to make our customers' everyday production processes in terms of packaging and palletizing efficient and simple.

THIS IS HOW WE ACHIEVE OUR VISION AND MISSION

Anchored in our vision and mission, we shape the future of packaging and palletizing with the following guiding principles.

INNOVATION. COOPERATION. QUALITY.

AT THE FOREFRONT OF INNOVATION

We want to be THE innovative supplier of intelligent packaging and palletizing systems for our customers. Growth through innovation and (further) development is therefore our focus and should enable us to position ourselves in new industries in the packaging sector.

WE ARE PARTNER AND SPECIALIST.

A long-term and cooperative partnership with our customers is the focus of our activities. For this reason, we want to maintain and further expand the quality of our partnership with customers in the future. In addition, we aim to strengthen our proximity to customers through local partners and customer service centers.

We have already established ourselves as a specialist for the packaging and palletizing of free-flowing bulk materials. With the packaging carousel CIRCUPAC, which was specially developed by us for the packaging of fine to powdery products, as well as new expansions in open mouth bagging machines, we also want to be THE contact for the packaging of fine to powdery products.

HIGH QUALITY IN ALL AREAS.

It is our concern to provide our customers with high quality in all areas, be it in the field of consulting, planning and implementation or regarding the plants themselves. For this reason, we want to maintain and constantly increase our quality standard in order to work to the complete satisfaction of our customers.

OUR VALUES

STATEC BINDER

OUR VALUES

Trust, reliability and partnership are the pillars of our actions - within the company and towards our partners and customers. For this reason, the motto „We deliver what we promise“ has a very high priority for our daily work.

In order to be able to offer our customers convincing solutions, we focus our commitment on innovative products and services. In doing so, we live our quality management and strive for continuous improvement.

We earn esteem and trust within and outside our company by treating each other fairly and with respect.

Performance, responsibility and reliability determine our daily work and the way we meet new challenges. With optimism, we focus on our opportunities when difficulties arise and on solving them when problems arise.

Information and business data are always handled responsibly and confidentially to protect our market position and jobs.

We trust our employees and give them the necessary freedom to develop their skills and meet changing demands. Flat hierarchies, team spirit and humanity characterize us.

We keep
what we promise.

TEAM WORK

OUR TEAM

STATEC BINDER

STATEC BINDER's goal is the complete satisfaction of its customers. From the beginning to the end. From the consultation meeting, through the project phase and installation of the machine, to ongoing support after successful commissioning and handover.

Without them, STATEC BINDER would not be as successful today: the strong team is what makes the company so successful. From its base in Austria, the company serves customers worldwide and works with partners to find the best solutions.

Whether sales, project management, engineering or assembly as well as delivery - at the Gleisdorf location in Austria, the know-how of the employees is bundled to enable a smooth project flow for the customers.

Employees learn from experienced colleagues through on-site training and can assume responsibility for their area of activity. Due to the flat hierarchy of the company, feedback can be given to customers more quickly and decisions can be made faster.

The STATEC BINDER team always works with motivation and commitment on a wide variety of projects and benefits from the extensive goodies as employees.

MADE IN AUSTRIA

PRODUCTS OF THE HIGHEST QUALITY

In addition to the dedicated team, the high-performance packaging and palletizing machines, are always tailored to the needs of each customer. The best possible solution is found for customers for their product and plant requirements. STATEC BINDER develops, designs and manufactures all packaging equipment and palletizing systems at its own ISO-9001 certified facility in Gleisdorf, Austria. Until today, more than 1,800 packaging machines and palletizers have been delivered around the globe and successfully installed to the complete satisfaction of the customers.

STATEC BINDER's high-tech machines stand for flexibility, reliability, high performance, and precision, and offer customers various advantages for efficiently designing and optimizing their packaging processes. The high-performance product portfolio for the packaging sector includes the **open-mouth packaging machines**, which are designed for polyethylene (PE), woven polypropylene (PP) and paper bags with a filling weight of 5 kg to 50 kg. On the other hand, the **FFS (Form-Fill-Seal)** machine for bag processing from the tubular reel and the vertical FFS machine for bag processing from the flat reel, offer individual solutions for packaging technology. The **palletizing** of all kinds of bags and cartons is provided by the fully automatic high level palletizer as well as the high performance robot palletizer and the portal palletizer. Like the packaging equipment, the palletizing systems also focus on flexibility and quality. The STATEC BINDER high-performance **net weighers** ensure precise **weighing and dosing**. Depending on the product, the scale is equipped with either belt, screw or gravity dosing. Our patented **bag closing system** or the high-performance sewing machine ensure safe and accurate bag closing. Manual and semi-automatic bagging systems as well as big bag filling stations round off the extensive product portfolio of packaging systems.

CUSTOMER SERVICE

WORLDWIDE CUSTOMER SERVICE

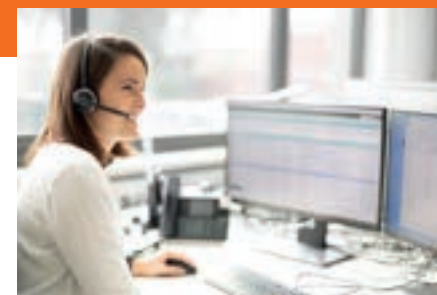

Complete customer satisfaction is a top priority for the European company. To ensure this, a comprehensive customer service program is also offered. With the 1-6-11 program, the company makes the promise that customers will receive excellent after-sales support. This is to provide customers with the best possible training for the equipment after purchase to guarantee the best possible operation of the machines. Specially trained and qualified employees are available to assist customers on site and commission the machines together with them. Perfectly coordinated service appointments and spare parts deliveries, customer training, a remote maintenance system & support as well as optimizations & modernizations of the system components in order to always be at the cutting edge of technology complete the comprehensive customer service offer.

„When rapid assistance is needed, I can be sure that a technician will be on site within a very short time. I really appreciate this efficient and uncomplicated way of working.“

SCHERF GmbH, AT | Type SYSTEM-F, BJ 1998 | PRINCIPAL-H, BJ 2011 + 2019

CUSTOMERS AND REFERENCES

WIDE-RANGING AND TRUSTWORTHY

STATEC BINDER's customers range from small businesses to large corporations.

Represented on all continents, STATEC BINDER supplies various industries. Whether petrochemical or chemical industry, animal feed & pet food, agriculture, minerals and fuels or food industry.

The high standard keeps its promise. For all industries, the perfect solution is always found in a customer-oriented manner - tailored to the relevant framework conditions. In addition to the standard product range, STATEC BINDER also offers customer-specific special solutions, which are worked out together with customers.

TRUST

The STATEC BINDER

SUSTAINABILITY FOCUS

STATEC BINDER

OPERATING SAFETY

WE SET A HIGH STANDARD FOR OUR BUSINESS AND PAY ATTENTION TO THE WELL-BEING OF OUR EMPLOYEES.

For this purpose, all workplaces have been equipped with height-adjustable desks, air-conditioning systems as well as oxygen measuring devices and much more. Safe handling is also maintained in the assembly hall and value is placed on safety clothing.

STATEC BINDER GmbH strives to create a safe and healthy working environment for all employees and visitors. Poten-

tial risks are continuously identified and evaluated, control measures are implemented, and appropriate training is provided to prevent accidents, injuries, and occupational illnesses. Regular safety inspections, audits and performance reviews are conducted to ensure compliance with operational as well as occupational safety standards and to promote a culture of continuous improvement.

SUSTAINABILITY

STATEC BINDER SUSTAINABILITY

SUSTAINABLE AND RESOURCE-FRIENDLY

Topics such as sustainability are becoming increasingly important alongside STATEC BINDER's exciting innovations. In order to continue to operate efficiently and to save resources, it was decided to renew the facade of the assembly hall at the Gleisdorf business location and to install a photovoltaic system. The renewal not only looks modern, but also makes a significant Sustainability focus ENERGY Use of sustainable energy throughout the company - through photovoltaic system and building insulations SAFETY Safety for operations and employees -Occupational protection & safety concepts NETWORK Reduction of flights through the network of local representatives worldwide SAVING Minimizing the environmental footprint: minimizing the environmental impact of our operations and products, resource conservation, waste reduction & recycling. contribution to energy-efficient operation. This renewal of the facade and the roof made it possible to integrate additional thermal insulation. In the course of the renovation work, the doors and windows of the manufacturing hall were also replaced. The larger windows offer, among other things, the advantage of more daylight in the assembly hall and impress with the additional thermal insulation glazing. In addition to this, a roof drainage system was installed.

The photovoltaic system with 1000m² solar panels, which has been in operation since the beginning of 2023, rounds off the sustainable overall concept for the recent renovation. With the existing panels, STATEC BINDER can generate up to 200 kWp of electricity itself and therefore contribute positively to energy consumption.

Employees can also support the sustainability of the company through the mobility campaign of the „company bike“ and e-cars can be charged cheaply at the company's own e-charging stations. The electricity for this comes sustainably from the STATEC BINDER photovoltaic system.

ENVIRONMENT

FOR THE LOVE OF OUR ENVIRONMENT

STATEC BINDER is committed to minimizing the environmental impact of company operations and products throughout their life cycle. Therefore, all applicable environmental laws, regulations and industry standards will be complied with at all times. The Company strives to exceed regulatory requirements wherever possible.

The company promotes resource protection, waste reduction and recycling initiatives to achieve sustainable practices and minimize its environmental footprint.
