

Total Solutions Provider of Gluing & Inspection Systems to the
CORRUGATED INDUSTRY

Adhesive Dispensing & Quality Assurance Systems

CONTROLS

MCP-4J

- 4-Valves, 4-Scanners
- Compatible with all glue station types except 6NC
- Jam Preventer (4 Channel)
- Auto-configuring voltage 90-240VAC
- Internal/External Pressure Control
- Job Storage (100)
- Inch/Metric
- LED display plus push-button overlay
- Auto-Glue mode
- OEM Communication
- Pulse-Purge
- Stitched patterns - jog on restart
- Data sharing with BoxChek 7
- USB port for system backups and software updates.
- Batch Count

MCP-12/OT-12

- 4-Channel gluing and inspection
- Compatible with contact glue stations
- 4-Channels Jam
- 115VAC or 230VAC
- 6" remote-mount color touch-screen
- Internal Pressure Control
- Inch/Metric
- Easily recognized icon-based access to gluing inspection
- USB port for software updates
- Alarm/Relay outputs
- OEM Communication (RS-232 only)
- Auto-Glue Mode

VCX/OT-120

- Up to 16 channels in modules of 4 in any combination of sensors and valves.
- Compatible with all glue station types
- Jam Preventer (up to 16 channels)
- Auto-configuring voltage 90-240VAC
- Internal Pressure Control (up to 4)
- External Pressure Control (up to 4)
- Easily recognized icon-based access to gluing inspection
- Job Storage (1000)
- Inch/Metric
- 12" Remote-mount Color touch-screen
- Data sharing with BoxChek 7
- OEM Communication
- Auto-Glue mode
- Pulse-Purge
- Stitched patterns - jog on restart
- The VCX base can fire up 16 valve per unit and 2 VCX base units can be connected to a OT-120

MCP-8/MCP-8I

- 8-Valves, 8 Scanners or 4-Valves, 4 Scanners, 3 Sensors
- Compatible with all glue station types.
- Jam Preventer (4 or 8 Channel)
- Auto-configuring voltage 90-240VAC
- Internal/External Pressure Control
- Job storage (100)
- Inch/Metric
- 4.5" Color touch-screen
- Alarm/Relay outputs
- Remote mount screen option
- Backup/Restore to/from external media
- Data sharing with BoxChek 7
- OEM Communication
- Auto-Glue mode
- Pulse-Purge
- Stitched patterns - jog on restart

In addition to the above features, the MCP-8I includes:

- 4-Valves, 3-Inspection Sensors, 1 marking valve
- Inspection capabilities (includes CGS-40 & CGS-40S)
- Scanner Lockout
- Supports kick, spray and linear ejector with tracking, no rotary ejection

CONTACT GLUE STATIONS

BOARDRUNNER™

- 900 electric glue valve
- Quick change from bottom-up to top-down
- Adjustable gap
- Adjustable weight relief air pressure
- Accepts applicator heads for glue patterns up to 2.5" wide (64mm) or in jumbo format up to 6" wide (150mm)
- Patented floating head design offers proper contact without impeding product flow
- Available as jumbo & dual-valve jumbo
- Integrated photo-eye

- BoardRunner glue station shown with CGS-40 Glue inspection sensor.
- Cost effective quality assurance option available with FlexosealPRO series controls.
- CGS-40 is also available as a stand-alone unit for glue pots with FlexosealPRO series and MCP-8i controls.

V-75/VO-700

- 366 pneumatic glue valve (24V or 12V)
- Adjustable spring pressure
- Accepts applicator heads for glue patterns up to 1.75" wide (45mm) or 3.75" wide (95mm) in jumbo format
- Available as jumbo
- Must be rebuilt for top-down/bottom-up contact glue station

COMBISTATION™

- 366 pneumatic glue valve (24V or 12V)
- Valves can be quickly replaced with quick-on modules
- Station can run bottom-up and top-down
- Adjustable spring pressure
- Available as jumbo

NON-CONTACT GLUE STATIONS

3NCR™/4NCR™

- 524 electric glue valves (up to 4)
- Quick reversing with two easy-hold levers
- Low restriction nozzles
- Patented tip sealer for top-down/bottom-up
- Adjustable product guides
- Adjustable delay to park glue station
- Can run in auto-glue mode on tab side
- Supports stitch and jog modes
- Staggered starts and glue lengths to match tab angles

COST-SAVING

Fast and simple order setup/change over

ADHESIVE FLEXIBILITY

Top-down or bottom up / high-pressure or low-pressure

LESS WASTE

Precision glue patterns with minimal adhesive consumption.

VERSATILITY

Flexibility with contact or non-contact systems

3NC™/4NC™

- Can run in auto-glue mode
- Supports stitch and jog modes
- Tip sealer technology for valves
- Low restriction nozzles
- 524 electric glue valves (up to 4)
- Supports 3 beads on 1/4" centers about 3/4 wide pattern or 19mm wide pattern
- Staggered glue lengths and pattern starts to match tab angles
- Adjustable product guides

6NC™/8NC™

- Adjustable product guides
- Can run in auto-glue mode
- Supports stitch and jog modes
- Supports angled glue patterns to match tab angles
- Tip sealer technology for valves
- Low restriction nozzles
- 524 electric glue valves (up to 8)
- Supports 6 valves on 11.4mm centers about 2.5" wide pattern or 64mm
- Staggered glue lengths and pattern starts to match tab angles

BOARDRUNNER™ NC

- 900 electric glue valve
- Adjustable gap
- Adjustable weight relief air pressure
- Accepts up to 4-hole angled non-contact nozzles

PUMPING SYSTEMS & BALANCING REGULATORS

1:1, 3:1, 6:1 BALANCING REGULATOR

- Pressure balancing regulator - relieves excessive pressure that occurs during high speed stops
- Ultra-precise and fast pressure control
- No shaft seals
- Easy rebuild
- Various ratios for specific application demands
- Rolling diaphragm design for frictionless movement and no losses

832 1:1 REGULATOR

- Stainless steel construction
- Air-piloted
- Easy manual adjust

DD - 1

- Trusted reliability of a 1:1 diaphragm pump
- Electronic shifting
- High flow rate
- Suction from totes, drums, and pails
- 1/2 NPT and 1/2 BSPP inlet/outlet fittings
- 24VAC source from Valco Melton controls or optional transformer box
- Wall mount, lid mount, or drum mount

EPP - 9

- High flow-rate 9:1 piston pump
- Electronic reversing
- Intelligent SLOW MODE feature prevents high cycle rates that occur during priming or when adhesive supply is blocked or depleted (dry cycling).
- Advanced Seal technology for 4 times the life of previous piston pumps
- 24V power supply are available 115/230VAC transformer
- Easy to clean and install
- In excess of 50 bar available glue pressure

PFM - 5

- Complete assembled package, 14:1 pump, 5:1 balancing regulator, 4-port manifold, and filter
- Shaft/seal cartridge for fast and simple repair
- Drum mount, wall mount, and pail mount options

TAPER CONVERSION KITS

HOT OR COLD GLUING PACKAGE

Valco Melton offers hot melt and cold glue taper conversion kits for General and Universal Tapers. These kits add flexibility and cut costs by enabling you to glue a manufacturers glue tab style box rather than tape. The components of the kits include brackets, applicator valves & heads, a pressurized glue source (melt tank with pump for hot melt systems) and solenoid-operated air valve that ties into the existing limit switch for the tapping mechanism.

- Eliminate costly tape, associated storage, and handling problems
- Increase belt speed for more production
- Improve quality with stronger bonds
- Operate with coated and non-coated board stock

MCP-6

The MCP-6 control is a cost-effective control that is set up to replace limit switches on taper machines. The MCP-6 can control tape, cold glue, and hot melt valves. This control can be set up as a timer or encoder base system.

EC Series Hot Melt Unit

Valco Melton's EC Series hot melt adhesive unit is supported by the most current features and technology and offers optimum reliability and control.

- LCD operator panel for ease of use and programming
- Optional integrated auto feed system and glue pattern control.
- Common footprint allows for universal installation
- Fast-reversing piston pump system

TR500M

- Eliminate scrap issues such as false system starts and unglued boxes
- Total weight: (8.8 lbs) 4kg
- Electric or Pneumatic versions available

TR500ME ELECTRIC TRIM REMOVER

- Eliminate tab trim and scrap
- Automatically speeds up when it detects products running on the machine.
- Mounting bracket package included
- Two high-speed, 4000 rpm motors
- Long lasting high wear-laminated blade sets
- Includes mounting hardware, lightweight aluminum extrusion

THE HOT MELT ALTERNATIVE

COST EFFECTIVE MELT UNITS

Valco Melton's new EcoStitch all-electric units are ideal for high speed folding carton applications. All EcoStitch Series units Ethernet IP integration, digital pressure control, adhesive usage data available on screen and full OEM integration with all digital based data.

- Set adhesive pressure based on line speed without adding additional components, encoders or peripheral equipment
- Calculate how much adhesive you use per hour, per day or per year.
- Control your melting system, pumping system and adjust pressure with this integrated solution.

**EcoStitch All-Electric
Hot Melt Unit**

EC Unit

MXM VALVES

MXM electric hot melt valve is the workhorse for most Valco Melton hot melt dispensing solutions. The MXM electric valve can operate at extremely high speeds reaching 15,000 cycles per minute for short bursts and have a lifetime capable of more than 2 billion cycles depending on operating conditions. The MXM is widely known as the EcoStitch capable valve in Food and Beverage packaging where end users see their adhesive usage reduced by up to 75% for instant ROI and process improvement.

Combine the speed of hot melt with the strength of cold glue.

- Cost-effective solution
- Maximize production
- Clean application
- Fast system payback
- Side feed or top feed assembly available for folder-gluer installation

PUR

Valco Melton's IsoMelt Mini and D4 PUR Series are designed to process reactive hot melts such as PUR. Units feature a fully integrated, multi-functional controller that is accessible from a user-friendly screen, which allows for fast and easy configuration changes and provides 'key-to-line' capabilities.

- Ideal for plastic packaging
- Swiveling tank lid allows for faster changes of PUR slugs, minimizing downtime

IsoMelt Mini

D4-PUR

DRUM & PAIL UNLOADER

Often, a 55 gallon (200 L) drum unloader or 5 gallon (20 L) pail unloader is preferred over a conventional tank unit.

- Unloaders are true melt-on-demand units. This keeps adhesive fresh and reduces charring that will occur in many tank units. PUR adhesives and adhesives sensitive to temperatures can be better controlled in an unloader.
- Many adhesives (particularly PSA and PUR) can be purchased more economically in drum form.
- Unloaders can generally melt and supply adhesive faster than standard tank units. 300 pounds per hour and higher can often be achieved.
- Drum unloaders are ideal for high viscosity adhesives that do not flow easily in a tank. Unloaders can commonly run in excess of 100,000 cps.

VISION & INSPECTION SYSTEMS

HOW IT WORKS

Work with your glue system and ClearVision inspection cameras with one screen using BoxChek7 inspection software. BoxChek7 brings users complete information on production line performance in real time. The screen simultaneously displays job statistics, defect images and history bar to facilitate analysis.

BENEFITS

- Detect and identify defective gluing (hot melt or cold glue), folding, barcodes, print registration, corrugator scores, as well as issues with sheets such as skew.
- Minimize configuration times with the system's ability to learn the position of the cameras and sensors.
- Streamline support sessions using the online chat window.
- Intuitive interface that displays real time images and data from each of the installed systems.
- Defect and performance data for all boxes stored locally in SQL database and can be easily accessed remotely with MeasurementChek.

MAKING QUALITY VISIBLE

GLUECHEK

GlueChk takes a picture of every glue pattern. The system analyzes the glue pattern to ensure that no gluing problems exist. When a gluing problem is found, GlueChk shows the defect on the screen with a large "X", notifies operators by alarm, then marks the defective box and saves an image of the gluing problem.

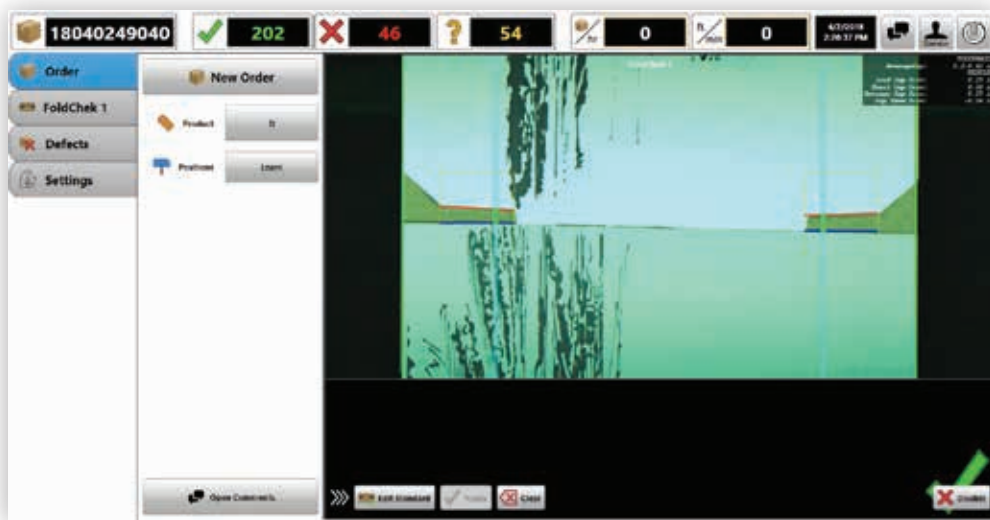

By identifying and removing all defects before shipment, box makers can now provide 100% perfectly glued boxes to their customers. Having saved a picture of every defect builds operator confidence, helps maintenance troubleshoot, checks for skewed boards, and increases customer satisfaction.

FOLDCHek

FoldChek takes a picture of every manufacturer's gap. It analyzes the gap for width and skew. When a problem is found, FoldChek clearly displays the defect on the screen showing what is wrong, sounds an alarm, marks the defective box, and saves an image of the defect. Customers can now be assured that their boxes are free from folding problems and gap variation. Box makers can accurately specify gap requirements to meet customer needs and ensure only perfectly folded boxes arrive at the customer's door.

BUNDLECHek

When any ClearVision camera identifies a defect, BundleChek receives a signal and marks the defective bundle. Then, when the bundle containing the defective box is identified by the BundleChek camera, it is immediately diverted to an alternate conveyor.

With BundleChek, manufacturers and customers alike can be sure that defective boxes are eliminated before the shipment makes it out your door.

CODECHEK

- Eliminate customer quality problems caused by mixed copy
- Detect most types of binary and 2D barcode formats, including UPC, Code 128, QR Code and Data Matrix
- Read barcodes at high speeds up to 30 boxes/sec, and in areas up to 23 x 23 cm
- Adapts to your production requirements with the ability to mount the camera bottom-up or top-down
- Integrate up to five different quality assurance systems using the ClearVision BoxChek 7 camera-based inspection platform

PRINTCHEK

PrintChek is a full sheet inline print detection system used to inspect unwanted spots, registration (color-to-color and color to cut), stripes, scratches, color, missing print, smearing, double-print/ghosting, drying, barcodes, blank measurement, board damage, delta-e color density, and skew. Can be used on flexo folder-glueers and die-cut presses.

GAPCHEK

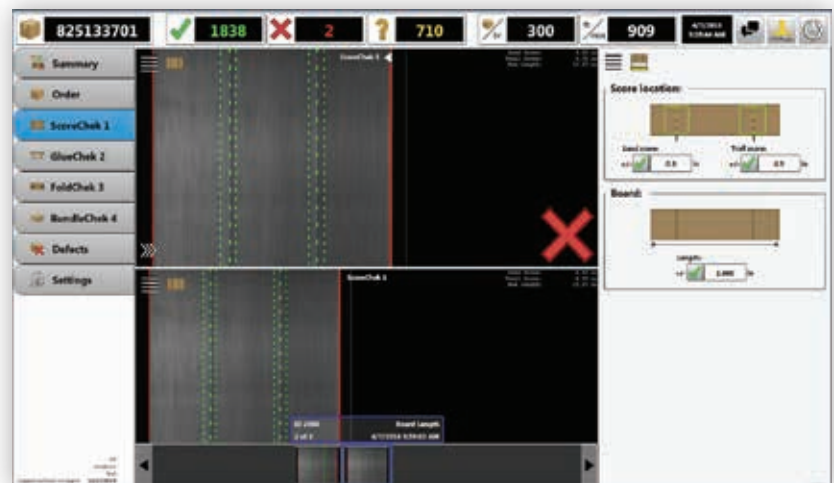

GapChek images the front and back of the entire straightened bundle and measures the lead and trail gaps directly at the box edge. Each box is therefore measured as completed, statistics collected and marked for ejection of bundles with out-of-tolerance folds. GapChek is compatible with any conveyor type and mounted after the counter-ejector or bundle strapper to ensure easy mounting of cameras and lights.

SCORECHEK

Deliver perfectly manufactured boxes to your customers by inspecting and ensuring the integrity of corrugator scorelines on your sheets using ScoreChk. Using innovative ShadowChk camera technology, ScoreChk automatically images the sheet to highlight the scorelines for analysis. Scoreline position can then be accurately verified in order to determine the blanks are being fed correctly and the scores are within tolerances.

REGCHEK

Using high speed imaging, RegChk captures images of each and every box to measure print variation in relation to the desired value set at the beginning of the order run. Where box design allows for it, RegChk also detects variations in the print registration in relation to the board edges, as well as variations in the slot depth.

GOT SUPPORT?

PREVENTIVE MAINTENANCE

- ✓ Valco Melton's AssurancePlus is designed to keep your gluing systems performing at the highest quality, while minimizing machine downtime.
- ✓ Ensure the availability of a trained Valco Melton service technician for a recurring scheduled date and time.
- ✓ Preventative maintenance costs 3-5 times less than reactive maintenance costs.
- ✓ Scheduled semi-annual Valco Melton technician PM visits reduce the total cost of ownership by properly training personnel, replacing wearable parts and helping to identify potential problems before they become larger problems affecting productivity and quality.

SUPPORTCHEK

- ✓ 24 hour remote support
- ✓ Monthly remote login and diagnostic check (with email report)
- ✓ Remote backup in case of system failure
- ✓ Access to MeasurementChek (tracks all boxes and orders run through machine)
