# ABOUT US

172, Hojukhwasan-ro, Oksan-myeon, Heungdeok-gu, Cheongju-si, Chungcheongbuk-do, 28101, Korea

I&S Co., Ltd., as the number 1 producer of synthetic leather upholstery in South Korea, is an honest company that uses only eco-friendly materials that have been internationally verified to produce our products.

SOFFKIN, the main product of I&S Co., Ltd. created though over 20 years of accumulated experience and technology, is a type of upholstery for household and office sofas and car seats that has been growing consistently upon its entry into the global market.

# HISTORY

Global No.1 casting company

# I & S CO., LTD.

I&S Co., Ltd. strives for innovative technology and products with eco-friendly, high-functional materials and presents solutions, and will continue to make unceasing efforts to be an honest company, fulfilling the needs of customers through constant new product development and quality improvements.

## QUALITY MANAGEMENT SYSTEM

We are placing the highest priority on technological and quality competitiveness based on the ISO 9001 quality certification, making high value-added versions of existing products, while also concentrating our corporate competencies for the development of global best-selling products to be a leader in the global market.

## ENVIRONMENTAL MANAGEMENT SYSTEM

With the introduction of the ISO 4001 certification for an environmental management system(EMS), we are picking up the pace with eco-friendly products alongside the formation of an eco-friendly corporate culture to present our global top-class eco-friendly products via the entire product lineup, dealing with production with consideration for the environment in all processes, from raw materials and manufacturing to the products themselves, their use, and their disposal.

## AUTOMOTIVE QUALITY SYSTEM

With the acquisition of the IATF 16949 LOC (Letter of Conformance) certification for an automotive quality management system, we are concentrating our corporate competencies to produce and develop without error the products currently in demand in the automotive market.

## To make good furniture, you must start with good materials.

**SOFFKIN** is an eco-friendly surface material that lets you enjoy the best relaxation on any piece of furniture.

SOFFKIN has outstanding quality and production capabilities with its diversified grades and is recognized by overseas buyers as a high-quality artificial leather fabric, a synthetic leather complete with practicality, functionality and design. It is a premium product that lets you feel a luxurious quality not found in other companies' products, allowing various expressive methods such as elasticity, surface feel, and color schemes depending on its use.

We have developed advanced technologies to fulfill the demands of customers, developing sensational designs to fit recent trends.

I&S Co., Ltd. will always strive to satisfy our customers through the supply of new products using better quality and accumulated technologies.

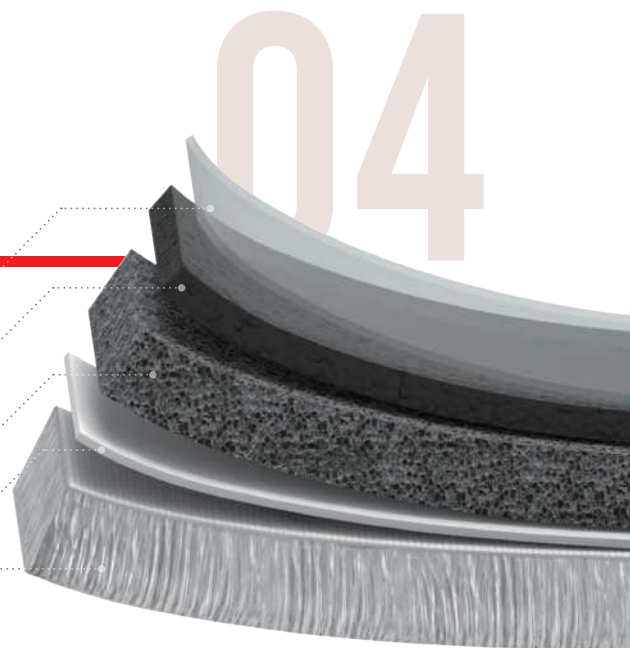

## PRODUCT FEATURES

- HIGH QUALITY** » A hybrid of casting processing and vacuum embossing, offering superior quality compared to natural leather, as well as premium detailed embossing patterns
- SOFT** » Differentiated from other materials, with better surface feel and soft cushioning to maximize the sense of quality
- LIGHTWEIGHT** » Conforms to trends with fine cell foam thickness and lightened fabric weight through the accumulated foam expansion system
- PROCESSABILITY** » Provides merits compared to other materials in terms of stitching, matching, connection, and wrinkling with superior stretching and restoration properties
- ECO**
  - » Offers eco-friendliness that anyone of any age can trust based on long-term know-how in product development with consideration for safety and the environment
  - » Top-class artificial leather upholstery, made by a company specializing in infant/child product manufacturing to be even safer and more eco-friendly
