MADE IN KOREA

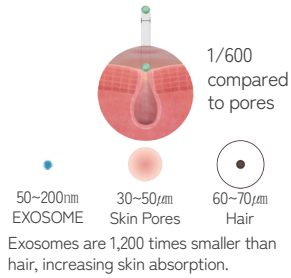

EXOSOME-AG

Patent Registration No. 10-2534286

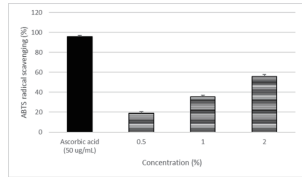

Exosomes-AG of fermented black garlic and aloe vera are signaling substances involved in cell regeneration.

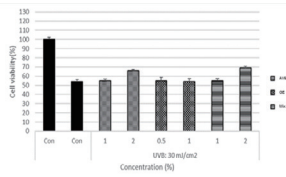

Diameter of EXOSOME

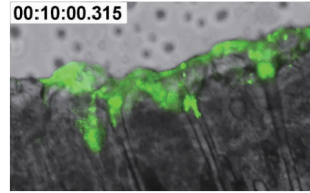

Antioxidative effect

Regenerative effects from UV damage

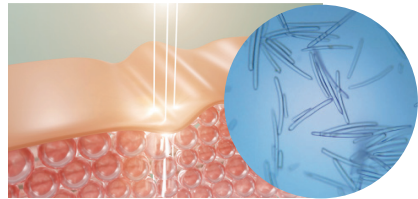

Collagen content reduced by UVB 30mJ/cm² increased by about 20% by EXOSOME-AG

The effectiveness of stem cells delivers minerals, growth factors, amino acids, etc. directly into the skin

BIO MICRO NEEDLE(SPICUS)

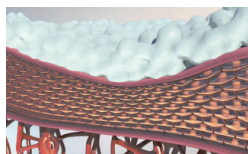

Patent Registration No. 10-2022-007981

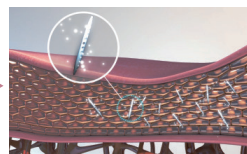

SPICUS is a substance that effectively delivers collagen and skin active ingredients to the dermis by coating vegetable collagen and Bifida Ferment Filtrate on natural microneedles.

It speeds up skin regeneration, helps new cells to be produced quickly, and helps to increase skin activity and care for wrinkled skin texture, which has been reduced due to aging, to make skin with lively and young energy.

Effective Substance Delivery Process by SPICUS

Troubled Skin

SPICUS Penetration and Action

Improved Skin

LARA CLARA EXOSOME-AG SKINCARE LINE

LARA CLARA EXO-AG HEMP MIST SERUM

80ml #EXOSOME #HEMPSEED OIL #PEPTIDE

ALL IN ONE Basic Care Spray (Fine Particle) Mist Serum
Delicately scented with a refreshing citrus aroma (using natural aroma oil).
Provides soothing for sensitive skin and relief for inner dryness.
Can be used for oily skin by controlling excessive sebum and oiliness.

An exosome mist supplying abundant nutrition to the dermis, including exosome-activated aloe vera and fermented black garlic.

Rich in proteins, Omega 3, 6, etc., with hemp seed oil (60,000ppm).
Perfect harmony with low molecular weight collagen synthesis peptides.

Skin Irritation test is completed (0.00)

LARA CLARA EXO-AG MTS AMPOULE

30ml #EXOSOME #BIO MICRO NEEDLE #PEPTIDE #EGF

Bio Micro Needle (SPICUS) contained:

By coating bifida fermentation product and plant-based collagen onto natural microneedles, it effectively delivers beneficial ingredients to the dermis, enhancing absorption rate.

It helps accelerate skin regeneration, promoting rapid generation of new cells and aiding in enhancing decreased skin activity due to aging and caring for wrinkled skin texture.

When applied to the skin, you may experience a tingling sensation, which is a natural occurrence to experience the effects of natural micro-needles.

Sensitive skin use suitability test completed. Skin irritation index is 0.00 (non-irritating)
■ Clinical institution: Human Skin Clinical Trial Center ■ Test date: April 23rd to 25th, 2024
■ Number of people: 32

LARA CLARA EXO-AG MTS PEPTIDE CREAM

50g #EXOSOME #BIO MICRO NEEDLE #PEPTIDE

This cream contains exosomes, natural micro-needles, and a peptide complex, providing not only skin hydration but also helping to improve problematic skin such as wrinkles.

The low-molecular-weight peptide complex aids in improving elasticity and reducing wrinkles, while balancing the skin's equilibrium to provide a quick moisturizing effect.

The efficacy of Skin Implant helps inhibit melanin synthesis, brightening the skin tone by bio micro needle.
