

Nakchun Co., Ltd

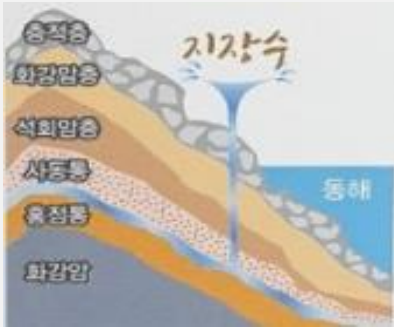

Product Introduction

Product Introduction

Nakchun crafts the finest liquor by capturing the pristine nature of the East Sea, using special natural Jijangsu and ocher yeast.

Jijiangsu natural water from
145m-deep loess bedrock

The world's first yellow
clay yeast

Promotes metabolism, Detoxifying effect,
Fatigue recovery, Hangover relief

Product Description

It is natural Jijangsu formed in a loess bedrock layer 145 meters underground.

The efficacy of Jijangsu

- Rich in minerals (Hardness : 120)
- Alkaline water with pH8.0
- Detoxifying effects(supports natural detox)
- Emits far-infrared radiation - Promotes metabolism and improves blood circulation
- Helps relieve atopic dermatitis symptoms
- Contains nano-sized loess particles
- Safe drinking water (regular quality inspections)
- Rich in negative ions

The world's first yellow clay yeast discovered

- Brewing yeast isolated from wild yellow loess
- Recipe patent application
- Yeast patent application

Jijangsu Records

- Dongui Bogam (Principles and Practice of Eastern Medicine)
It's nature is cool and non-toxic, It relieves the distress of poisoning and resolves all other toxins.
- Bencao Gangmu (compendium of Materia Medica)
Dig a hole where ocher is present. This was called Jijeong or Tojang.
- Royal Longevity
Practices For detoxifying, there is nothing as effective as Jijangsu.

The efficacy of Donghae Yakcheon Jijangsu

- Nakchun's unique Ipguk(grain fermentation starter) production method
- Yeast is cultivated in-house fermentation lab
- Ipguk is produced directly by Nakchun
