BEYOND THE TOP BRAND OF ELECTRIC BICYCLES, THE LEADER OF PERSONAL MOBILITY.

In 1994, ALTONSPORTS has established its own factory with the capacity of producing 1 million units annually in China. Our factories have helped to quickly reflect consumer needs. ALTONSPORTS, which has completed a young and stylish brand image, is incorporated into the INOX series in 2015. It was a time of great change both at home and abroad. We started to renovate our production plant in China to improve the quality

remarkably. In recent years, we have set up a dedicated development department and a dedicated Smart Mobility sales team to facilitate rapid market response and product development. ALTONSPORTS has been promoting electric bicycles for the first time in Korea for the third consecutive year. We are ready to leap from a bicycle to a personal mobility leader in a unified attitude that is not satisfactory to the present.

5

ALTON HISTORY

1990	1994	00	Established Company
	1995	08	Established Factory in China
	1997	03	Launched ALTON a bike for mountain riding advanced to markets in Japan and Southern America
2000	1998	03	Advanced to markets in northern America
	2001	04	Newly changed company name ALTONSPORTS CO., Ltd
	2003	03	Acquired Japanese safety test SG mark
	2003	11	Started manufacturing in China Tianjin factory (production capacity 1million units)
	2009	03	Electric bicycle development (Newly established by R&D department)
2010	2011	08	Listed on KOSDAQ
	2011	12	Merged with COREX
	2012	02	Established E-ALPS electric bicycle corporation
	2012	12	Awarded the Excellence prize at the 8th Korea Sports Industrial Competition
	2013	02	Acquired Green Technology Certification
	2013	10	Awarded the Grand prize at '2013 GOODDESIGN AWARD' for ROADMASTER R-series
	2013	12	'Selected as 'Industrial Convergence Leading Company' (Ministry of Trade, Industry and Energy)
	2015	03	Affiliated with INNOX
	2015	07	Transferred to Pangyo(headquarters -incorporated office)
	2015	07	New CI Launching
	2015	12	Awarded the Grand prize at '2015 GOODDESIGN AWARD' for ROADMASTER TOCHKA
	2016	03	Constructed integrated ERP of headquarters
	2016	12	Awarded the Excellence prize at '2016 GOODDESIGN AWARD' for E-ALTON Spade
	2017	07	Selected as 'Global Premium Living Goods'
	2018	11	Awarded the Grand prize at '2018 GOODDESIGN AWARD' for E-ALTON NIMO FD
2020	2019	03	Started supplying e-bikes to Kakao Mobility, which offers e-bike sharing system
	2020	06	E-Alton, Awarded for Grand Prize of 2020 National Brand Award. Acquired for 3 consecutive years.

ALTON FACTORY

ALTONSPORTS, the only domestic bicycle manufacturer to have its own factory capable of producing 1 million bicycles per year, is creating modern designs and responding quickly to changes in the global bicycle market. In 2015, the company transplanted a quick and efficient process system from the IT company INNOX(mother company), creating a more accurate and smooth production system. We have strengthened our productivity through thorough division of labor, and by establishing an exceptional quality control department for 0% reject rate, we have also increased the completion rate of our products. In addition, we strive to make the working environment better by drastically improving the infrastructure of the dormitories, restaurants, and lounge for improving the welfare of the employees inside the factory.

THE NATIONAL BRAND GRAND PRIZE

EALTON NIMO FD EDITION

ALTONSPORTS has been honored many times at the Good Design Awards, organized by the Korea Design Promotion Institute, and proved its value as an advanced design. E-ALTON's Electro-bicycle model, 'SPADE' was selected as the Excellent Award in 2017, and 2018, new E-ALTON model, NIMO-FD received the Good Design Award as well. In addition, in 2016, TOCHKA, by ROADMASTER's minimalistic design Pixie model, received the Grand Prize. And also received the national brand award for the fourth consecutive year and was recognized as the representative electric bicycle of Korea. ALTONSPORTS does not stay satisfied in the current state, but continues to be the leading brand, reinforcing one of ALTON-brand essence, 'Stylish'.

Ealton

ALTONSPORTS is the first Korean brand to develop e-bikes as a leading electric bicycle brand based on its technology behind successful commercialization of the electric bicycle.

Especially loved for its sleek and uncomplicated design, the E-ALTON won the Good Design Awards, organized by the Korea Institute for Design Promotion, for the fourth year in a row and received excellent design recognition. In addition, as a result of the test conducted by the Korea Consumer Agency in 2017, it received the highest score in the overall assessment. As a result of comparative testing the E-ALTON CITY model has been the longest running, lightest and most affordable, with the best performance in most categories. In addition, the technology also enables the use of a safer electric bicycle by obtaining a Korean patent for the insertion of a battery into the battery.

ROAD BIKE

Road bike is a bicycle built to enjoy speed on paved roads or on a relatively even road surfaces.

The frame design is critical to ensure a wide range of gear ratios for maximum speed and to minimize air resistance while riding. In addition, compared to a mountain bike, the use of wheels with a larger outer diameter and narrower tires reduces friction with the road surface allowing a faster, and more exciting experience with the power of one's own.

HYBRID

The Hybrid Bicycle is a bicycle developed to meet the needs of consumers who want fast speed and a reliable and comfortable ride at the same time.

It combines the benefits of a mountain bike and a road bike equipped with thin wheels, and employs a flat bar for stable driving. Its comfortable riding position and its ability to go as fast as a road-bike makes it popular for consumers who want to ride bikes for a variety of purposes, including commuting and light hiking.

FOLDING & MINIVELO

Minivelo is a combination of the English word 'Mini' and the French for bicycles, 'Velo'. It is a bicycle

designed to make the body compact and light weight, so it can be carried or ridden easily. The light weight body makes it easy to move and store, so anyone can enjoy convenience. Especially among ALTON's minivelo line up, the foldable models for maximum portability in vehicles and public transportation are loved very much by our customers.

JUNIOR

Bicycles can ride up to
105~165cm.

we have various bike line-up with suspension and disc brakes. We applied the essential elements to the first bike learners. It is a good idea to present it to your child for exercise or schooling.
