

EQUI-BASE[®]

SOOTHING CARE FOR THE SKIN THROUGH THE ACID-BASE BALANCE

The skin is the largest organ of the human body. It is through the skin that we absorb active agents and release toxins. Skin is an excretion organ as well as an absorption organ. EQUI-BASE bath salts perfectly assist these two functions.

What is Biosana EQUI-BASE?

The Biosana EQUI-BASE beauty products consist of basic elements and agents which are either natural, close to nature, or identical to nature. EQUI-BASE contains many valuable minerals such as calcium, potassium, magnesium, silicon (silica), vitamin C, zinc, iron, manganese and more, that purify and nourish the skin and promote smooth, silky and radiant-looking skin.

What does Biosana EQUI-BASE do for the body?

EQUI-BASE stimulates and eliminates acidic wastes and toxins to support the acid-base exchange in the skin. The acidity gets eliminated by reducing the disposal of minerals and by reducing the accumulated contaminated materials and hyper acidification. The neutralization of acids promotes the regulation of dry skin. EQUI-BASE supports the relief from bruises, muscle pain and stiffness, psoriasis, eczema, and fungal infection, frequently seen in persons with unbalanced pH. By detoxifying and eliminating waste from the refined skin texture, diets are more effective, skin quality is better, the liver's work-load is reduced, cellulite diminishes and skin regains its elasticity. By neutralizing acidity, skin regains its natural lubrication thereby becoming smooth, radiant and satiny. EQUI-BASE can assist to reduce pigment disorders and through the release of pollutants helps remove brown spots and warts from the old age. EQUI-BASE can refresh and cleanse the skin gently and can remove dead skin cells. Chapped and rough skin becomes smooth, silky and soft by the acid neutralization, exfoliation and re-oiling of the skin. UVA / UVB protection and natural Vitamin E, found in some EQUI-BASE products, helps against light-induced skin aging and protection of the skin.
