- Homepage: <http://www.polyskin.co.kr>

Product

- Product: Pack on Pack – standard type / separated type
- Development: Spread-type mask pack(wash-off/sleeping), Functional cosmetics etc.

2. Pack on Pack

What if you want deep absorption of the mask pack ingredient? What if it was too cold at the time of the mask pack?
What if you want more moisture skin?

New Concept! Protective Cover for Facial Mask

Pack on Pack

팩온팩

● Pack on Pack

● Facial Sheet Mask
(nutrition facial cream, essence, sleeping pack etc.)

Pack on Pack is a protective cover for facial sheet mask. It is made of LDPE. It helps to make skin more moisture. You can attach it on sheet mask, essence, nutrition cream of face.

Pack on Pack keeps moisture under it, and extend the usage time of mask sheet. It helps open the pores and make good ingredients be absorbed.

2. Pack on Pack

[Prototype Design]

[LDPE material]

[Product design – 2019]

Name and Trademark

- Name: Pack on Pack , Patent pending (Korean Application No:1020180015023)
- Trade mark1.
- Trade mark2.

Application No: 40-2018-0134128

팩온팩

Application No :40-2018-0162898

Product type / Material

Standard

- Mask sheet shape, as 1 sheet

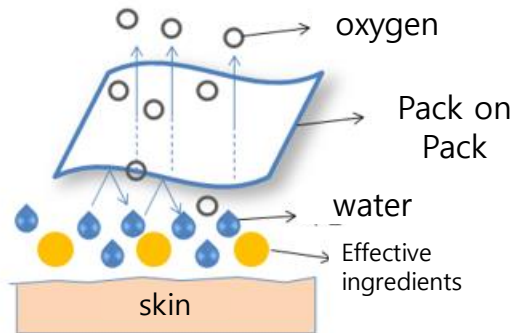

Separated

- Composition of two sheets, separated as upper part and lower part.

- Material: LDPE(Low density polyethylene) , approved by FDA

2. Pack on Pack

[Principle of Pack on Pack- LDPE membrane which allows oxygen to pass through and keeps moisture]

[Image of a woman who attached 'Pack on Pack' over mask sheet on her face]

Use

- Keeping moisture and protection function when using mask sheet, sleeping pack and facial functional cream
- Use after anesthesia creams in dermatology
- Use after nutrients pack in esthetic shop

Effect

- Improvement of skin moisturization (40% of moisture vaporize when attached mask sheet only. The rate of vaporization attached with 'Pack on Pack' is just under 5%)
- Extend the time of using essential sheet mask by the usage time of 'Pack on Pack'
- Natural thermal effect as prevent moisture evaporation. (rise for 2.2°C compare to using without 'Pack on Pack')
- 'Pack on Pack' helps skin absorb effective nutrients by open pores, and it also make soothing effect as remove it after 10~15mins. Because skin turns cool after remove 'Pack on Pack' by evaporation of water on skin surface.(2-way effect)
- Prevent hands from getting essence.

3. References

Reference 1.

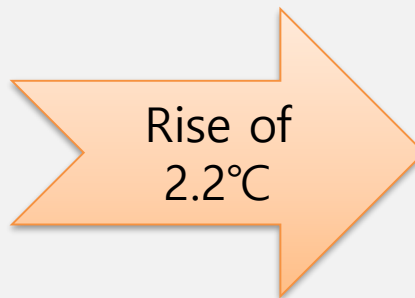

About 2.2°C of temperature was risen on skin attached 'Pack on Pack' over mask packs compared to the case where only mask packs are attached.

When we use 'Pack on Pack', it keeps moisture on skin and raise the temperature for 2.2 °C. It helps to dilate our blood vessels and increases our metabolism.

[Temperature differences of skin surface]

[only mask sheet]

[Pack on Pack + mask sheet]

[Temperature was checked after 5 minutes.
Each case is tested at 23.6 °C, humidity 10%]

3. References

Reference 2.

Pore comparison experiment.

Pack on Pack off

Mask Pack only.
Face temperature 32.7 °C
Pore Index 60

Pore size was
increased for
18%

After remove
of 'Pack on
Pack', pores
came to
smaller like as
initial state.

Pack on Pack on

Mask pack+Pack on Pack.
Face temperature 35.2 °C
Pore Index 71

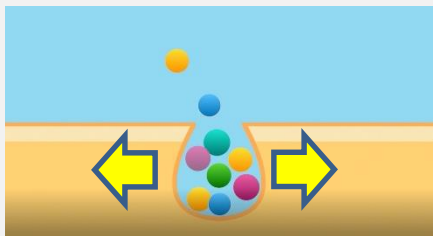

Tested with Aram-hubis API100, woman in there 40s

4. How to Use

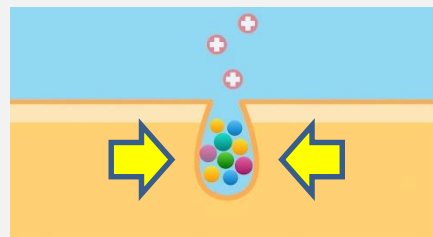

How to Use

STEP1. First, attach a mask sheet on face. Then attach 'pack on pack' on it. Let the embossed surface inside.

[Pores are opened and absorb good ingredients]

STEP2. Wait 10~15mins for the good ingredients to be absorbed.

[Pores became to smaller by cooling because of vaporization]

STEP3. Remove only 'pack on pack' on a sheet mask. Then wait 15mins more for soothing and cooling effect of the mask sheet.

5. Photos

1. Standard type(50 sheets/pack)

2. Separated type (50 sets of sheets/pack)

6. Specifications

[Specifications]

1. Size: ① Standard 15.5*29.0*1.0 cm
② Separated 15.5*29.0*1.2 cm
2. Materials: ① Pack on Pack – LDPE
