SCIENTIFIC PHYTOAROMATHERAPY

PRODUCT CATALOG 2016

English

# welcome to **terpenic** labs

**“We are the response that is local, close-by and has maximum guarantees in the world of scientific phytoarometherapy.”**

## **What is the Lab's origin?**

During my pre-thesis stage as a researcher in the Immunology Department of the Clinic Hospital, I came across some articles on the activity of essential oils in the treatment of various pathologies. It was there when I discovered a new passion: the use of essential oils for medicinal purposes (SCIENTIFIC AROMATHERAPY).

Later I had the opportunity to work in several aromatherapy laboratories and I was able find out about the needs of the sector and that of customers. By mid-2011, I embarked on this project together with two friends, who are great professionals and also brothers, José and Raul Guerrero. I had had the opportunity to work with José previously; he has a great commercial and human vision. Raul is passionate about design and branding.

## **What has motivated your very rapid growth in the sector?**

In our case, I like to think that is not due to a single factor.

Our friendship, the way of relating to each other, is the image which we

have projected. That has allowed us to create collaborative links with suppliers, farmers, pharmaceutical wholesalers, distributors and customers, creating true synergies (very suitable word), instead of merely commercial relations.

For us the fact that the lab is like a family business is what allows us to compete in such a global and impersonal market. It is vitally important to be focused in the communication and active listening of our customers. To that aim, the human team is completely involved in the project, as well as in all and each one of the processes. I would like to take advantage of these lines to say thank you.

And last but not least, we work with criteria of quality and seriousness that have supported us in very demanding businesses and which have laid the foundations for the development of new products and lines.

## **What novelties have you launched at INFARMA?**

As this is the first time that we participate in INFARMA, we want to advertise all the laboratory's lines as

■ from left to right:  
Raúl Guerrero,  
graphic designer;  
Javier Gómez, CEO;  
José Guerrero, CBO;  
founding partners of  
Terpenic Labs.

Terpenic Labs is a laboratory that was founded at the beginning of 2012 by a group of young entrepreneurs and in a short time it has become one of the leading laboratories in scientific phytoaromatherapy at national level. Its philosophy is simple: to apply technological advances for the research and development of products that base their activity in natural active ingredients, mainly botanically and biochemically defined essential oils (chemotyped) and high quality vegetable oils.

**LA VANGUARDIA**

Tuesday 23rd March 2015

Number 47.948

[www.lavanguardia.com](http://www.lavanguardia.com)

Follow the latest news on our blog:  
<https://www.blog.terpenic.com>

much as possible. Our priority is that those attending know that they can find a response that is local, closeby and has maximum guarantees to their needs in the world of SCIENTIFIC PHYTOAROMATHERAPY.

We offer a line of intelligent design to improve and differentiate all of our products.

**With such an active present day, does this give you time to think of the future?**

Of course. The Terpenic project is a long-term project. This sentence represents what we stand for, "By guaranteeing growth we guarantee the future". For this reason we are working on several projects: a new website with more content, information for the professional, training and utilities. We are beginning to design it in four languages for the international projection that we are looking for. New product lines. An editorial project... We don't have time to sleep (laughter).

Terpenic Medical is our proposal for all healthcare professionals who are looking for an efficient response with products formulated with natural ingredients.

Thanks to the techniques of analysis, we can determine exactly the main ingredient responsible for each therapeutic action. With this information, and the cooperation of different healthcare specialists, we have developed a product line that includes specialties such as dermatology, surgery, radiation oncology, aesthetic medicine, rheumatology, sports medicine or palliative care.

## **Chapter 1:**

# **MEDICAL LINE**

# CALMADERM®

## Protection and care of irritated skin

### Properties:

Solution of oils to treat and look after the skin after having been exposed to situations that may cause redness, swelling and itching such as beauty treatments (peeling, laser, hair removal), radiotherapy, sun exposure, burns or abrasions.

### Uses:

- Diabetic foot care.
- To restore damaged and/or injured skins.
- Erosions, irritations, dermoabrasions...
- Prevention and treatment of UPP.
- Prevention of superinfections.
- Prevention and treatment of radiodermatitis.

### Ingredients:

Glycine Soja, *Coryllus avellana* Oil, *Rosa rubiginosa* Oil, *Lavandula angustifolia* Essential Oil, *Anthemis nobilis* Essential Oil, *Calendula officinalis* Extract, Linalool\*, Tocopherol\*, Citronellol\*, Geraniol\*, Limonene\*.

**CNS 176379.2**  
(10ml Jar)

*Coryllus avellana*  
Virgin Hazelnut  
Vegetable Oil

*Anthemis nobilis*  
Roman Chamomile  
Essential Oil

*Lavandula angustifolia*  
Lavender Essential Oil

*Rosa rubiginosa*  
Rose Hip Vegetable Oil

*Calendula officinalis*  
Calendula Oleate

### Observations:

100% active ingredients. Free of parabens, petroleum derivatives, alcohols or fragrances.

# CAPSICUM

## SOOTHING HEAT ACTION GEL

### Properties:

CAPSICUM is a gel that has been developed to relieve acute pain (with or without inflammation) such as rheumatic pains, cervicalgia, back aches, lumbago, muscle contractions, post-traumatic recoveries or postural overloads caused by pregnancy. CAPSICUM will not dry out the skin as its formula contains no alcohols or hydro-alcohols.

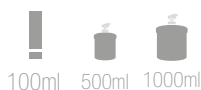

### Ingredients:

Aqua, *Juniperus communis* Essential Oil, Triethanolamine, Carbomer, *Eugenia caryophyllata* Essential Oil, *Ocimum basilicum* Essential Oil, *Capsicum frutescens* Extract, *Mentha piperita* Essential Oil, Acrylates/C10-30 alkyl acrylate crosspolymer, Phenoxyethanol, Clorphenesin, Glycerin, Citral\*, Eugenol\*, Isoeugenol\*, Limonene\*, Linalool\*.

### Observations:

100% active ingredients. Free of parabens, alcohols or fragrances. Suitable for Tecar Therapy

● Obtained from Organic Farming

Medical Line

# CELUDERM®

## ANTI CELLULITE FORMULA

### Properties:

Prevention and treatment of soft, hard and sclerotic cellulite (orange peel skin). With a level of optimal absorption and lipolytic and diuretic action that helps to fight against cellulite even in the toughest areas. Silk Formula. Provides natural skin hydration and an optimal penetration of ingredients thanks to its composition.

### Ingredients (Cream):

Aqua, Decyl oleate, Glyceryl stearate, Caprylic/Capric triglyceride, Glycerin, Cetyl alcohol, Citrus limonum Essential Oil, Ceteareth-12, Limonene\*, Pelargonium graveolens Essential Oil, Foeniculum vulgare Essential Oil, Phenoxyethanol, Citral\*, Citronellol\*, Geraniol\*, Linalool\*, Chlorphenesin.

### Ingredients (Oil):

*Prunus dulcis* Oil, *Citrus limonum* Essential Oil, Limonene\*, *Foeniculum vulgare* Essential Oil, *Pelargonium graveolens* Essential Oil, Tocopherol\*, Citral\*, Citronellol\*, Geraniol\*, Linalool\*.

### Observations:

100% active ingredients. Free of parabens, alcohols or fragrances. Suitable for Tecar Therapy

Essential Oil

*Pelargonium graveolens*  
**Geranium**  
Essential Oil

*Foeniculum vulgare*  
**Bitter Fennel**  
Essential Oil

# CICATRIDERM®

## PREVENTION AND TREATMENT OF SCARS

### Properties:

CICATRIDERM is a solution of oils to prevent and treat abnormal, hypertrophic and keloid scars. It improves the appearance of the scar. The final healing process stage is shortened for recent scars, so the scars are less noticeable, the skin is more elastic without hyper-pigmentation.

In old scars the affected area of the anomalous scar is reduced, providing greater elasticity and homogenisation of the skin.

In addition to being a 100% active natural oil solution, CICATRIDERM is an ideal product to use in physiotherapy treatments so as to restore scarred skin.

### Ingredients:

*Rosa rubiginosa* Oil, *Commiphora myrrha* Essential Oil, *Petroselinum sativum* Essential Oil.

### Observations:

100% active ingredients. Free of parabens, petroleum derivatives, alcohols or fragrances.

CNS 176381.5

Dropper

*Rosa rubiginosa*  
Rose Hip Vegetable Oil

*Commiphora myrrha*  
Myrrh Essential Oil

*Petroselinum crispum*  
Parsley Essential Oil

# EURADERM®

FORMULA - HIGHLY MOISTURISING  
ANTI-STRETCH MARK FIRMING

## Properties:

Cream with a high moisturising strength that has a pleasant aroma of lavender from **Provence**. Prevention and treatment of recently formed stretch marks created by pregnancy, abrupt changes in weight, endocrine changes or breast implants. Also for the prevention and treatment of states of flaccidity: post-childbirth, hormonal changes, significant variations in weight, post-dermolipectomies, post-liposuctions.

## Ingredients (Cream):

Aqua, *Glycine soja*, *Rosa rubiginosa* Oil, Glyceryl stearate, Cetearyl alcohol, *Lavandula angustifolia* Essential Oil, Ceteareth-20, Linalool\*, Glycerin, *Calendula officinalis* Extract, Ceteareth-12, Acrylates/C10-30 alkyl acrylate crosspolymer, Phenoxyethanol, Butylated hydroxytoluene, Triethanolamine, Tocopherol\*, Geraniol\*, Limonene\*, Chlorophenesin.

## Ingredient (Oil):

*Prunus dulcis* Oil, *Commiphora myrrha* Essential Oil, *Ocimum basilicum* Essential Oil, Tocopherol\*, Citral\*, Eugenol\*, Limonene\*, Linalool\*.

Calendula Oleate

# LIVIUM<sup>®</sup>

## TIRED LEGS GEL

### Properties:

Activator gel for venous return with the feeling of natural freshness. Prevents and relieves tired or sore legs. Suitable for use during pregnancy and for patients on anti-coagulant medication. Improves recovery after interventions such as vascular sclerosis. Since it is not a cold gel, it provides a pleasant natural freshness, which decreases the feeling of heaviness during the warmer months and can be applied throughout the year in more persistent cases.

### Ingredients:

Aqua, *Vitis vinifera* Oil, Glycerin, *Helichrysum italicum* Essential Oil, *Rosmarinus officinalis* Essential Oil, *Salvia sclarea* Essential Oil, *Ocimum basilicum* Essential Oil, *Mentha piperita* Essential Oil, Sodium polyacrylate, Ethylhexyl stearate, Trideceth-6, Phenoxyethanol, Chlorphenesin, Eugenol\*, Geraniol\*, Limonene\*, Linalool\*.

### Observations:

100% active ingredients. Free of parabens, alcohols or fragrances. Suitable for Tecar Therapy.

SUITABLE FOR  
**TECAR**  
THERAPY

At Terpenic Labs we have developed a product line for professional use, aimed at different areas in the world of massage and body treatments.

The areas we cover range from physiotherapy or professional sports massage, to spas and urban health farms without of course forgetting that they are suitable for home use.

We offer a fast, simple and non-expensive way of providing professionals with a product that does not need formulations to be prepared and offers maximum efficiency and performance.

The oils and creams from the professional line help therapists in their treatments.

SUITABLE FOR  
TECAR  
THERAPY

**All our massage creams are  
SUITABLE FOR TECAR THERAPY**

**All our creams are  
PARABEN FREE**

**All our creams are  
CRUELTY FREE**

## **Chapter 2:**

# **MASSAGE SYNERGIES**

## BASE DIY Professional Base Cream. Do It Yourself

Base cream formulated to dilute water-soluble and/or fat-soluble active ingredients. Ideal to prepare customised formulas both in the field of massage, cosmetics or beauty treatments, as well as in the field of therapies (flowers of Bach, phytotherapy, etc).

### Ingredients:

Aqua, Decyl oleate, Glyceryl stearate, Caprylic/Capric triglyceride, Glycerin, Cetyl alcohol, Cetearth-12, Phenoxyethanol, Chlorphenesin.

Free Of Parabens, Perfumes and Fragrances.

Suitable for Tecar Therapy

Supports up to 4% of active ingredients in the original formula

Neutral / Non-greasy Hypoallergenic

## MASAJE Professional Massage Cream

With no active ingredients. Low absorption massage cream. Optimised yield.

### Ingredients:

Aqua, Paraffinum liquidum, Decyl oleate, Dimethicone, Isopropyl myristate, Propylene glycol, Glyceryl stearate, Stearic acid, Cetearyl alcohol, Cetearth-20, Cetearth-12, Triethanolamine, Phenoxyethanol, Butylated hydroxytoluene, Acrylates/C10-30 alkylacrylate crosspolymer, Chlorphenesin, Glycerin.

## CIRCULACIÓN Circulation Stimulating Formula

Formulated with **cypress**, **hyssop** and **geranium**. Circulation favours the phlebotonic, vasoconstrictive and lymphotonic action of the peripheral circulatory system. Ideal to **warm up muscles** or to relax them after physical exercise..

### Ingredients (Cream):

Aqua, Decyl oleate, Glyceryl stearate, Caprylic/Capric triglyceride, Glycerin, Cetyl alcohol, Cetearth-12, *Cupressus sempervirens* Essential Oil, *Hyssopus officinalis* Essential Oil, *Pelargonium graveolens* Essential Oil, Phenoxyethanol, Citral\*, Citronellol\*, Eugenol\*, Geraniol\*, Limonene\*, Linalool\*, Chlorphenesin.

### Ingredients (Oil):

*Prunus dulcis* Oil, *Cupressus sempervirens* Essential Oil, *Hyssopus officinalis* Essential Oil, *Pelargonium graveolens* Essential Oil, Tocopherol\*, Citral\*, Citronellol\*, Eugenol\*, Geraniol\*, Limonene\*, Linalool\*.

## DREN Draining Formula

Formulated with **palmarosa**, **clary sage** and **peppermint**. Coadjuvant to the therapist's manipulations. The synergy of the active ingredients used generates a **lymphotonic and refreshing action** providing a very pleasant sensation.

### Ingredients (Cream):

Aqua, Decyl oleate, Glyceryl stearate, Caprylic/Capric triglyceride, Glycerin, Cetyl alcohol, Ceteareth-12, *Salvia lavandulifolia* Essential Oil, *Cymbopogon martinii* Essential Oil, *Geraniol*\*, *Mentha piperita* Essential Oil, Phenoxyethanol, Citral\*, Farnesol\*, Limonene\*, Linalool\*, Chlorophenesin.

### Ingredients (Oil):

*Prunus dulcis* Oil, *Salvia lavandulifolia* Essential Oil, *Cymbopogon martinii* Essential Oil, *Geraniol*\*, *Mentha piperita* Essential Oil, Tocopherol\*, Citral\*, Farnesol\*, Limonene\*, Linalool\*.

## MUSCULAR Decontracting Muscle Formula

Formulated with **rosemary**, **laurel** y **peppermint**. It relaxes and returns tone to the contracted and tight muscle groups.

### Ingredients (Cream):

Aqua, Decyl oleate, Glyceryl stearate, Caprylic/Capric triglyceride, Glycerin, Cetyl alcohol, Ceteareth-12, *Rosmarinus officinalis* Essential Oil, *Laurus nobilis* Essential Oil, *Mentha piperita* Essential Oil, Phenoxyethanol, Eugenol\*, *Geraniol*\*, Limonene\*, Linalool\*, Chlorophenesin.

### Ingredients (Oil):

*Prunus dulcis* Oil, *Rosmarinus officinalis* Essential Oil, *Laurus nobilis* Essential Oil, *Mentha piperita* Essential Oil, Tocopherol\*, Eugenol\*, *Geraniol*\*, Limonene\*, Linalool\*.

## RELAX ZEN Anti-stress Relaxing Formula

Formulated with **lavender**, **marjoram** y **vetiver**. Especially indicated for processes of stress or anxiety, it provides an extra well-being and relaxation thanks to the synergy between the essential oils included in its formula.

### Ingredients (Cream):

Aqua, Decyl oleate, Glyceryl stearate, Caprylic/Capric triglyceride, Glycerin, Cetyl alcohol, *Lavandula angustifolia* Essential Oil, Ceteareth-12, *Vetiveria zizanoides* Essential Oil, *Origanum majorana* Essential Oil, Phenoxyethanol, *Geraniol*\*, Limonene\*, Linalool\*, Chlorophenesin.

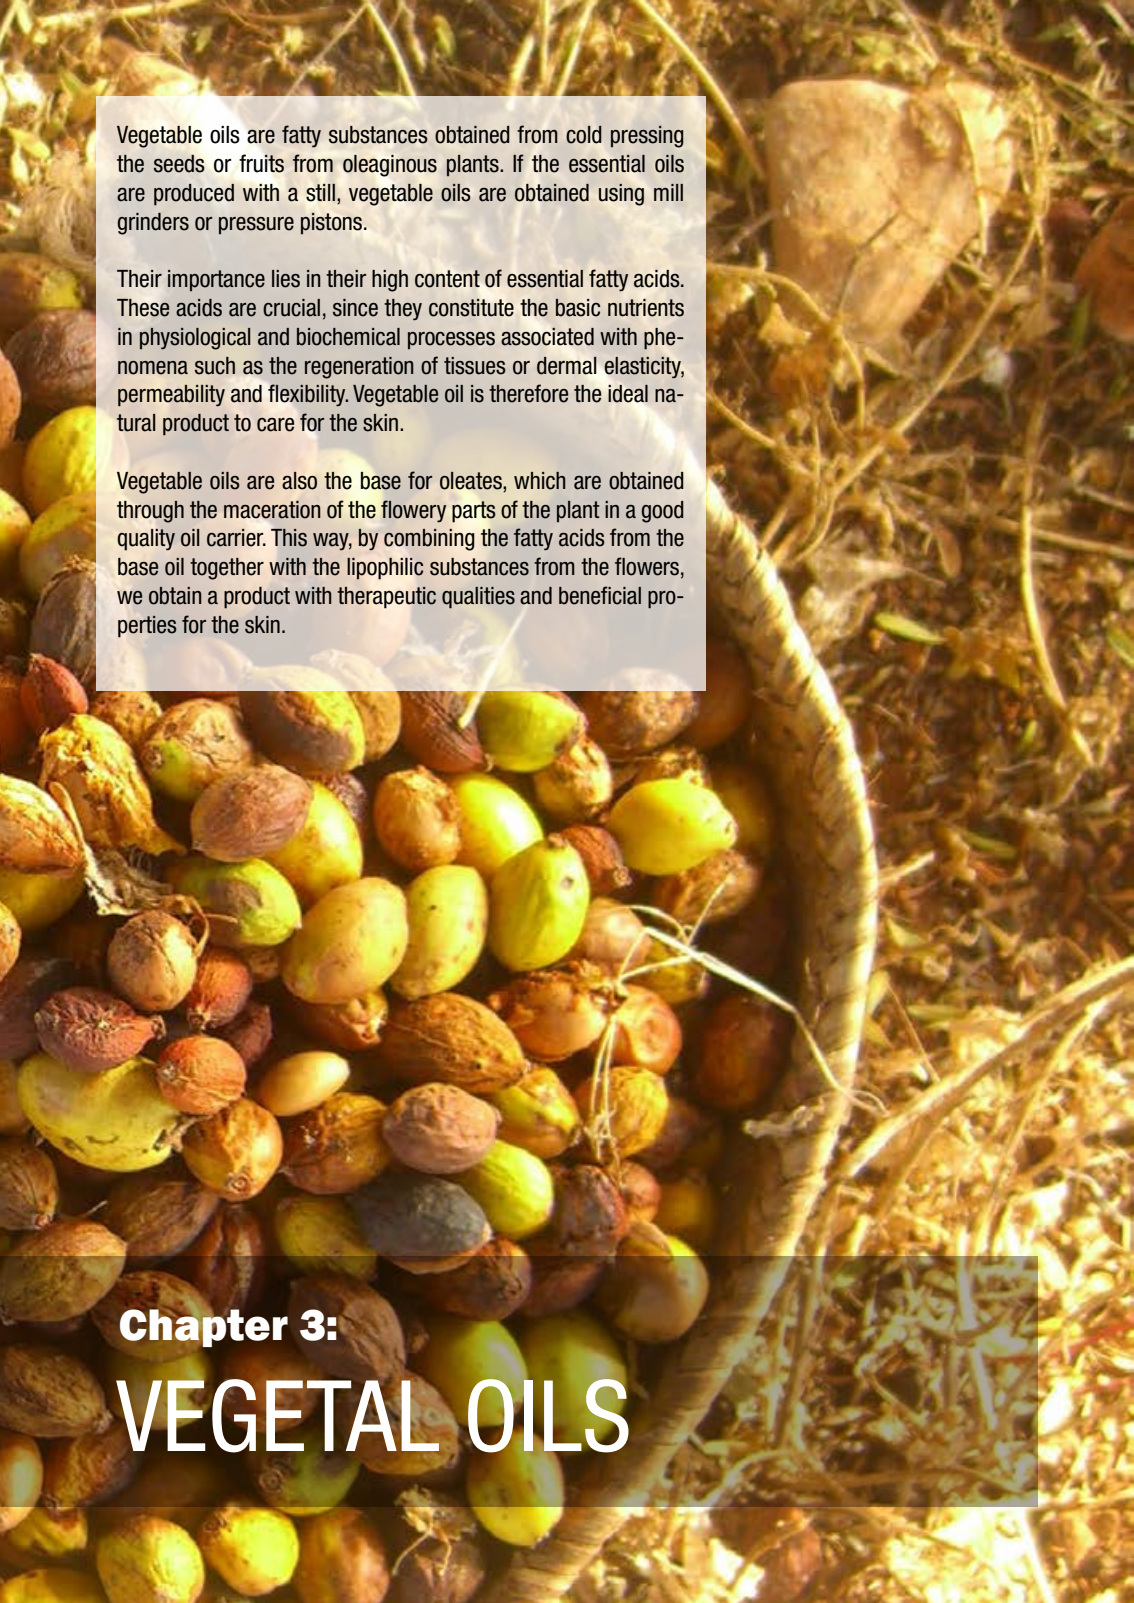

### Ingredients (Oil):

*Prunus dulcis* Oil, *Lavandula angustifolia* Essential Oil, *Origanum majorana* Essential Oil, *Vetiveria zizanoides* Essential Oil, Tocopherol\*, *Geraniol*\*, Limonene\*, Linalool\*.

Vegetable oils are fatty substances obtained from cold pressing the seeds or fruits from oleaginous plants. If the essential oils are produced with a still, vegetable oils are obtained using mill grinders or pressure pistons.

Their importance lies in their high content of essential fatty acids. These acids are crucial, since they constitute the basic nutrients in physiological and biochemical processes associated with phenomena such as the regeneration of tissues or dermal elasticity, permeability and flexibility. Vegetable oil is therefore the ideal natural product to care for the skin.

Vegetable oils are also the base for oleates, which are obtained through the maceration of the flowery parts of the plant in a good quality oil carrier. This way, by combining the fatty acids from the base oil together with the lipophilic substances from the flowers, we obtain a product with therapeutic qualities and beneficial properties for the skin.

## **Chapter 3:**

# VEGETAL OILS

Available in

## APRICOT

**VIRGIN**

First Cold Pressing

**REFINED**

*Prunus armeniaca*

Soothing for sensitive skin, regenerator for dull and fatigued skins, for baby skin care.

Available in

## ARGAN UNROASTED

*Argania spinosa*

**ORAL  
OIL  
BIO  
VIRGIN**

First Cold Pressing

Unroasted. Facial glow, dry and dull hair, prevents skin aging, skin regenerator, fragile nails, dry skins, cracks, burns.

Available in

## ARNICA

*Arnica montana*

**BIO  
OLEATE**

Macerated in sunflower oil, it is a great ally for bruises, bumps and knocks. Indispensable in any household with children.

Available in

## AVOCADO

*Persea gratissima*

**ORAL  
OIL  
BIO  
VIRGIN**

First Cold Pressing

Skin aging, skin inflammation, dry skin and massages.

Available in

## BABASSU

*Orbignya speciosa*

**BIO  
VIRGIN**

First Cold Pressing

Dry skins. Pleasant, soft and smooth sensation. For the preparation of salves, facial creams, body lotions.

Available in

## BAOBAB

*Adansonia digitata*

**BIO  
VIRGIN**

First Cold Pressing

Skins that have suffered some outer layer damage having lost their barrier function. Very suitable as a massage oil.

Available in

## BL. CUMIN

*Nigella sativa*

**ORAL  
OIL  
BIO  
VIRGIN**

First Cold Pressing

Rich in essential fatty acids, especially in omega 6. Contains a small percentage of essential oil. Suitable for all types of skin, especially dry and sensitive skins. Skin aging, regenerating and smoothing.

Available in

## BORAGE

*Borago officinalis*

ORAL  
OIL  
BIO  
VIRGIN

First Cold Pressing

Atopic skins. Anti-wrinkle regulator for the sebaceous glands. Care of nails and hair.

Available in

## CALOPHYLLUM

*Calophyllum  
tacamahaca*

BIO  
VIRGIN

First Cold Pressing

Treatment for acne and scars. Skin rashes and scalp and beard dermatophysis.

Available in

## CARROT

*Daucus carota sativa*

ORAL  
OIL  
BIO  
OLEATE

Burns, impetigo, eczema, dermatitis, rashes and itching.

Available in

## CASTOR

*Ricinus communis*

BIO  
VIRGIN

First Cold Pressing

Nutrition and care for eyelashes and eyebrows. Looks after and hardens nails. Not recommended for use in oral therapy (irritant bowel).

Available in

## HEMP

*Cannabis sativa*

BIO  
VIRGIN

First Cold Pressing

Care and nutrition of hair and for dandruff treatment. Almost perfect proportion of essential fatty acids. Anti-aging effect.

Available in

## HYPERICUM

*Hypericum perforatum*

BIO  
OLEATE

Contusions, wounds, inflammation, burns and ulcers.

Available in

## JOJOBA

*Simmondsia chinensis*

VIRGIN

First Cold Pressing

Moisturiser for all skin types: face and body, greasy, dry and dull hair, acne and cracked skin.

Available in

## LIN

*Linum usitatissimum*

ORAL  
OIL  
BIO  
VIRGIN

First Cold Pressing

Cellular regeneration effect for cracked and rough skin. Sebaceous regulator. Fragile and brittle hair and nails.

Available in

## COCONUT

*Cocos nucifera*

ORAL  
OIL  
BIO  
VIRGIN

First Cold Pressing

It is a soft and silky oil, highly recommended for irritated skin and especially indicated for people with sensitive skin.

Available in

## GRAPE SEED

*Vitis vinifera*

BIO  
VIRGIN

First Cold Pressing

Great for massage as an option to sweet almond oil. It penetrates the skin without leaving it feeling greasy. Anti-inflammatory and antiplatelet properties.

REFINED

Available in

## HAZELNUT

*Corylus avellana*

VIRGIN

First Cold Pressing

Acne, scalp hyperseborrhea and oily skins. Especially indicated for massages for babies due to its pleasant smell and optimum penetration.

Available in

## MACADAMIA

*Macadamia ternifolia*

ORAL  
OIL  
BIO  
VIRGIN

First Cold Pressing

Dry, rough and sensitive skin. Regenerative and softening effect. Treatments to condition hair. Mix well with evening primrose oil and hemp oil.

Available in

## MARIGOLD

*Calendula officinalis*

OLEATE

Irritations in babies, burns, cracked skin, itching, skin irritation, radiodermatitis, ulcers and urticaria.

Available in

## NEEM

*Melia azadirachta*

BIO  
VIRGIN

First Cold Pressing

Fungicide, antiseptic and anti-staining. Hair restoring properties. Mosquito repellent.

Available in

## PALM

*Elaeis guineensis*

ORAL  
OIL  
BIO  
VIRGIN

First Cold Pressing

Mainly used for producing soaps.

Available in

## PEANUT

Peeling and scabs on the scalp. It has been used for arthritis and joint pains.

Available in

## PRIMEROSE

Eczema and anti-dark circles. Reduces acne and combats rosacea.

Available in

## RICE GERM

Protects against external aggressions (UV, pollution...) and prevents skin dehydration. It favours micro-blood circulation, (anti-bags, anti-dark circles, anti-wrinkles).

Available in

## ROSEHIP

Acne, skin shine and softness, old or recent scars, eczema, psoriasis, sun stroke, dry skin, burns and ulcers.

Available in

## SWEET ALMOND

Massages, looking after all skin types, irritated, dry or baby skin, erythema, skin aging, cracked skin and cradle cap.

Available in

## TEPEZCOHUITE

Irritations in babies, burns, cracks, itching, skin irritation, radiodermatitis, ulcers and urticaria.

Available in

## TIGER NUT

Eczemas. Anti-aging properties due to its high content in vitamin E.

Available in

## SACHA INCHI

*Plukenetia volubilis*

**BIO**

**VIRGIN**

First Cold Pressing

Anti-aging effect due to its high content in Omega3. Protects the skin, hair and nails.

Available in

## SESAME

*Sesamum indicum*

**ORAL OIL**

**BIO**

**VIRGIN**

First Cold Pressing

Aphthous ulcers, hair care, cracked skin, sores, massages, dry skins and burns.

Available in

## SHEA

**ORAL OIL**

**BIO**

**VIRGIN**

First Cold Pressing

*Butyrospermum parkii*

**ORAL OIL**

REFINED

Reflexology, healing, soothing, mature skins, babies and masks.

Available in

## WALNUT

*Juglans regia*

**ORAL OIL**

**BIO**

**VIRGIN**

First Cold Pressing

regenerator, anti-aging and skin toner. Anti-fungal especially against candida. Polishes and nourishes wood giving it a shine.

Available in

## WHEAT GERM

*Triticum vulgare*

**ORAL OIL**

REFINED

Anti-aging, moisturising, dandruff, prevents the formation of stretch marks, make up remover, for mature or very dry skins.

A close-up photograph of lavender flower spikes in a field. The background is a bright, hazy sky with a prominent sun flare, creating a warm, golden light. The lavender flowers are in various stages of bloom, with some showing vibrant purple and others appearing more dried or yellowed.

**Chapter 4:**

# ESSENTIAL OILS

ABSOLUTE AND HYDROLATS

Essential Oils are substances that are generally obtained by dragging the part or parts of the aromatic plants that contain the ductless glands over water vapour currents. Essential Oils are therapeutic ingredients due to their composition.

### **Chemotype, Component Producer and Origin**

Interestingly, plants of the same botanical family (such as Rosemary, *Rosmarinus officinalis*) can have different uses due to the fact of having grown in different places. Environmental, climatic and soil conditions fully determine the biochemical composition and with this their applications.

Terpenic Labs seeks plants with the optimal therapeutic attributes for distillation in the most remote places of the world.

All our oils are 100 % pure with botanic specificity, indicating the part of the distilled plant, its origin and the biochemical definition (chemotype). We certify our oils with the Chemotyped Essential Oil seal, a physical-chemical test that proves the quality of the product.

We use the most up to date scientific technology available to select the Essential Oils. We analyse each Essential Oil using gas chromatography and mass spectrometry to offer the highest standards of quality. Chromatography allows us to obtain an “x-ray” of the types and quantities of molecules that each essential oil contains, and in this way we ensure we work with the appropriate product.

### **Biological Seal**

We have a line of essential oils with an Organic farming certificate. This seal certifies respect for natural systems and cycles, as well as sustainable production through biological and mechanical processes linked to the land.

# NATURAL FORMULA FOR BODY AND HAIR

## LIQUID SOAP BASE

The Base Liquid Soap of Terpenic Labs has been created from mild surfactants and detergents as well as from biodegradable components. We have obtained a soapy liquid base formula with a 5.0 pH that is respectful with the skin's and hair's hydrolipidic cover. Especially suitable for sensitive skin and pediatric use. The ability to add ingredients allows for a wide variety of hygiene products, such as body gels, shampoos, capillary balsams, masks, etc.

# OCÉLIA

## ULTRASONIC HUMIDIFIER

The OCÉLIA humidifier helps to ionize and restore environmental humidity, allowing any type of essence or synergy to be disseminated thanks to water micronization technology using ultrasound.

With its compact and effective design, it helps restore environmental humidity and creates a comfortable and balanced environment, ideal for all the family.

Silent

Dissemination of essential oils

Auto power-off

2 nebulization levels

Ambient lighting

120 ml capacity  
3-4 h autonomy
