

DONGA INDUSTRIAL MACHINERY CO., LTD.

Spray Cleanser & Ultrasonic cleaner

**DONG-A INDUSTRIAL
MACHINERY CO. LTD**

ABOUT **DONG-A SANGI**

Donga Sangi Co., Ltd. is the enterprise which considers environment, human and technology as the basic concepts, and it exerts endless effort for supplying washing equipment with pro-environmental characteristic, economical price and high quality.

We take active measures for the diverse requirements of customers and respond to the demands of these clients through persistent development of washing machine which is adequate and efficient for the process and does not cause any harm to human body.

A variety of standard models are available with which the items from small to extra-large size can be washed, and all models are registered with patents. In addition, we are confident that the plan from which practical help and solution are provided to you as far as washing is concerned can be presented.

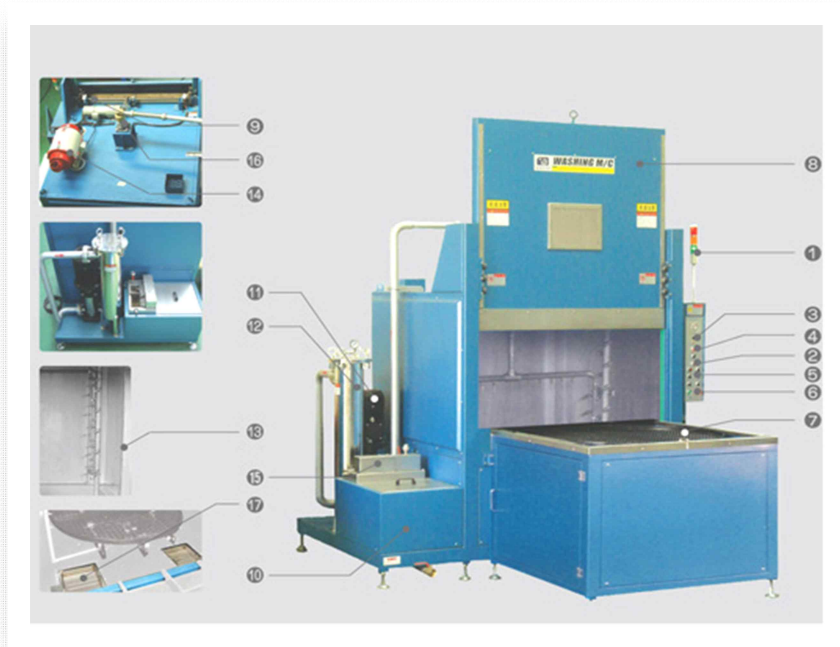

Donga Sangi Co., Ltd. progresses toward a specialized enterprise with global competitive power while firmly stabilizing the basis in the section of washing industry.

We appreciate continuous attention of customers and we will respond with the best technical capability and sincerity.

Thank you.
Representative Director Byeong-Woon Lee
All executives and personnel

MAIN PRODUCTS

1 SPRAY CLEANER

- _Compact design and realization of the minimum space to set up
- _A simple trouble-free construction with rotation of nozzle head by jet pressure
- _Progress of working due to the suitable height and the light door of cleaner basket for taking in and out parts.
- _This system is an efficient cleaner for complex large parts through jetting without omission, by rotation of nozzle head lots of hot water jetting from powerful pump.
- _Maintaining the best washing state due to the management of washing tank from outside of the washer
- _As loading, taking in and taking out of products are realized with 2 baskets at the right and left side of the device, operation time is saved and convenience of operation is greatly increased.

MAIN PRODUCTS

2 ULTRASONIC CLEANER

_Elevated washing effect can be obtained through harmonization of ultrasonic wave and washing liquid, and this is the automatic equipment which performs ultrasonic washing, rinse, and steam cleaning/drying

_As the basket loading /unloading is accomplished at the identical position, occupying space is greatly saved and the waste of time due to the movement of operator is minimized.
