

“RARA”

A special choice for a healthy life!

Drink Hydrogen Water

ELYW-2500H(MD)

Hot/Cold H₂ Server

YW-1400T

Hybrid H₂ Server

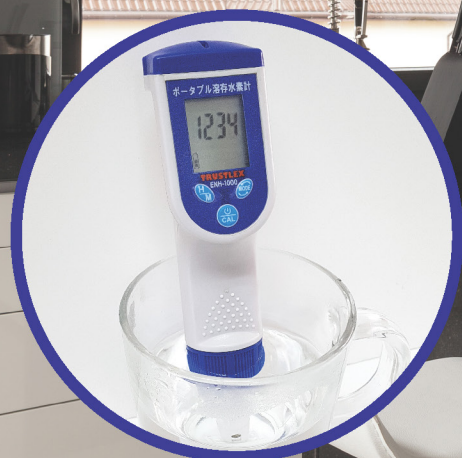

YWH-070

Handy H₂ Server

Healthy water technology!

“**RARA**” take the lead for hydrogen water.

Features

- It takes high concentration hydrogen dissolved water immediately without waiting.
- High concentration hydrogen dissolved water can be taken immediately at any time 24 hours.
- Real time hydrogen water generation never makes hydrogen compounds in the cold / hot water tank.
- Excellent water purification performance by using high quality filter.

Water filter

1~2 Steps CARBON BLOCK Filter

By using the block-shaped carbon, it efficiently sticks and removes the suspended matter, rust, chlorine and organic chemical substances, and removes effectively trihalomethane with the protective function of the hydrogen generator.

3 Step COMBINATION Filter

Block carbon, and far-infrared rays and ceramics that generate anion are scientifically arranged to remove the unpleasant taste and odor remaining in the water to enhance the purity of the water and refresh the water taste.

4 Step Hydrogen Generator

Using platinum-coated titanium and a specially treated diaphragm, pH-neutral water and high-concentration hydrogen water with hydrogen dissolution greater than 1.0ppm are produced in real time.

CLEANING Filter

It treats the released oxygen to protect the electrodes of the hydrogen generator and to maximize the amount of dissolved hydrogen.

Stand

ELYW-2500H(MD)

Product Size	250 (W) X 450 (D) X 450 (H)
Product weight	18kg
Power Consumption	Cold 150W / Hot 350W
Tank capacity	Tank 2.0L / Cold 2.0L / Hot 1.2L
Rated voltage	220V / 60Hz
Cooling / heating system	Compressor
ORP	Over -300mv
pH	7.0~8.5
Water supply ability	0.9 ~ 1.2L / M

ELYW-2500H(MG)

Product Size	250 (W) X 450 (D) X 450 (H)
Product weight	18kg
Power Consumption	Cold 150W / Hot 350W
Tank capacity	Tank 2.0L / Cold 2.0L / Hot 1.2L
Rated voltage	220V / 60Hz
Cooling / heating system	Compressor
ORP	Over -300mv
pH	7.0~8.5
Water supply ability	0.9 ~ 1.2L / M

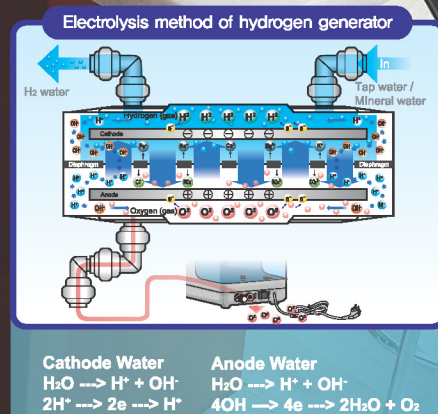

ELYW-2500S(S1)

Product Size	250 (W) X 370 (D) X 1,150 (H)
Product weight	18kg
Power Consumption	Cold 150W / Hot 350W
Tank capacity	Tank 2.0L / Cold 2.0L / Hot 1.2L
Rated voltage	220V / 60Hz
Cooling / heating system	Compressor
ORP	Over -300mv
pH	7.0~8.5
Water supply ability	0.9 ~ 1.2L / M

New Standard for Good Water!

Hydrogen Water Purifier "RARA"

Fresh, and Clean Water —

YW-1400T

Product Size	155 (W) X 335 (D) X 255 (H)
Product weight	3.5kg
Power Consumption	60W
Tank capacity	About 4L
Rated voltage	220V / 60Hz
Filter type	Composite block carbon filter
Hydrogen concentration	About 1200ppb
Water supply ability	About 1.0L / M

Features of H2 SERVER "RARA"

- With pressing button, simultaneously generate high concentration water within 1 second
- Stable continuous generation of high concentration water
- Built-in water tank can be used without connecting water
- Minimal size makes effective use of space/portable
- Mineral water, purified water, tap water all support
- Simple filter replacement and state-of-the-art self-diagnosis system

10cm ultra slim under sink water purifier

One-spin type filter system makes easy for anyone to exchange filters.

Four-stage filter system to make clean water taste

Step 1 - Sediment filters

- Preprocessing step
- Remove scum, remove rust.
- 5 micron filter effectively removes suspended solids.

Step 2 - Pre carbon filter

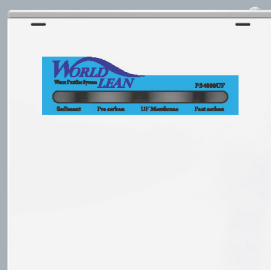

- The activated charcoal filter with excellent adsorption removes chlorine, carcinogenic substances, organic chemical components, and odor from the water.

Step 3 - Ultra filtration membrane Filter

- The fine hollow fiber membrane developed by advanced technology filters out all germs and impurities that remain in the water and passes only clean water that contains the minerals that are good for the body.

Step 4 - Post carbon filter

- High-quality carbon filter made of coconut shell
- Removes the unpleasant taste and odor remaining in the water, enhancing the purity of the water and refreshing the water taste.

PS-4000

Product Size	100 (W) X 380 (D) X 360 (H)
Product weight	4kg
Water purification system	4Steps Purification Sediment Filter / Pre carbon Filter UF Membrane Filter / Post carbon Filter
Watering system	Direct pipe connection
safety device	Leak-proof device

The living water that you can see and feel -
Do you see?
This pure hydrogen nano bubble!

YWH-070

Product Size	65 (Ø) X 98 (H)
Product weight	191g
Power Consumption	5W
adapter	IN: AC100-240V, 50/60Hz, 2.0A OUT: DC 5V 2A
Operating time	5Min./Once
Charging time	About 2hours
Hydrogen concentration	About 1000ppb
Built-in battery	3.7V 1060mA 1Cell (More than 20 times)

After drinking hydrogen water, the odor is eliminated from the large intestine and the body becomes lighter.

Drinking more than 2 liters of water a day for 2 to 3 weeks will eliminate stench in your stools and make your body easier to use. It is a physiologically significant phenomenon that the stench disappears from the stool. This means that abnormal fermentation (decay) has been eliminated in the stomach, and the elimination of active oxygen by the action of hydrogen means that various diseases such as cancer can be prevented. Hydrogen water contains about 500 times more active hydrogen than ordinary tap water, and this active hydrogen combines with active oxygen which is harmful to our body, thereby eliminating active oxygen. This fact was demonstrated at the Sarahata Laboratory in Kyushu University, Japan.

(In the battle with cancer by reducing water, author: Hideo Hayakawa)

Why is active oxygen bad for our bodies?

It can be beneficial if the active oxygen occurs in the body 2%, but if it occurs more than 3%, it will cause the cell to rust, and causes 90% of, or more diseases. It is believed as a common opinion of the general medical community that the harmful active oxygen, which damages our body (the cause of aging and disease), can be removed by antioxidant substances (SOD).

('Active oxygen was the cause of the disease,')

Dr. Yoojin Oh / Professor of Biochemistry, Denham Herman, Nebraska Medical University, USA in 1954)

Why is hydrogen water good for our body?

Human organs and skin have very low ORP values of -100mv ~ -200mv. This is because the harmful component is decomposed by the reducing agent. Therefore, active oxygen which is known to cause various lifestyle diseases including cancer, diabetes, hypertension and aging is converted into water harmless to the human body by the action of hydrogen water, so that it is effective in various intractable diseases caused by active oxygen and prevention and treatment of aging.

(The 21st century's all information of the good water for body, Shoji Kubota)
