

The perfect match

mekoprint

Mekoprint for more than 50 years

Mekoprint is a privately owned company with approx. 300 employees and several production sites. We supply the highest standards of products and solutions to customers within industrial, medical, automotive and telecom applications in more than 40 countries.

The perfect partner is innovative, value adding and globally oriented. It is our goal to become your preferred partner and ensure that you get safely and efficiently from idea to final solution.

Mekoprint is the perfect match for international customers with special requirements for products and total concepts within user interface solutions, high volume flexible printed circuit boards, EMC solutions, cable harnessing, graphic overlays, metal nameplates and metal solutions.

Customer specific solutions for all industries

Mekoprint delivers the highest standards of customized products and solutions for all major industries – industrial, medical, automotive and telecom.

Industrial

Medical

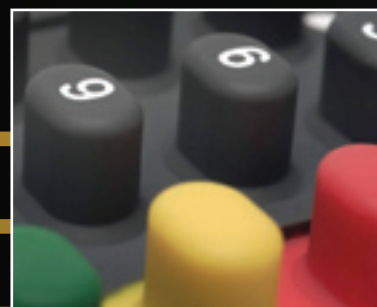

Automotive

Telecom

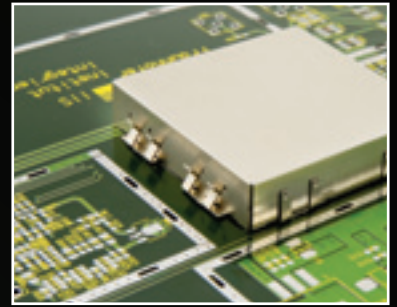

Product groups

User interface solutions

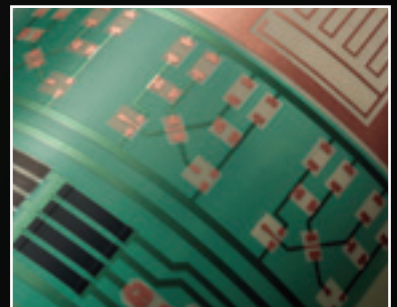

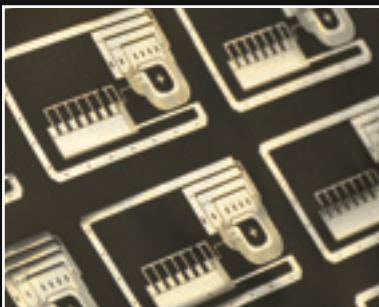

Membrane, metal, capacitive and rubber keyboards as well as integrated touch panel solutions. High degree of design freedom by integration and combination of different key board technologies.

EMC shielding & etched metal parts

Etched or punched thin metal solutions such as EMC shielding with excellent performance and high accuracy. Manufacture in low and high volumes, e.g. ready for SMT mounting in reels.

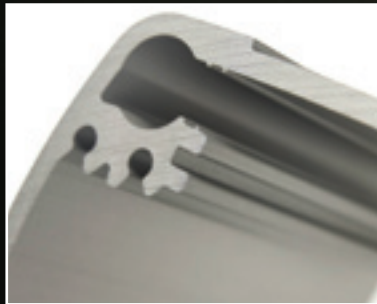

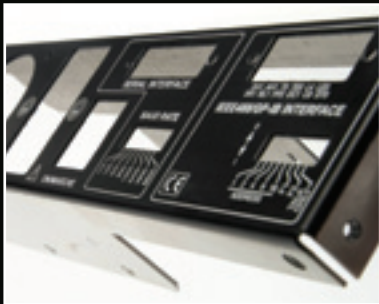

High volume printed products

Roll-to-roll production of flexible connectors, circuits, RFID antennas, overlays, printable sensors, safety shielding, foils and heating elements.

Product groups

Metal solutions

Sheet metal cabinet parts, front panels and milled parts in aluminum, steel or stainless steel. Optional powder painting, anodizing and screen printing.

Graphic overlays

Screen or digitally printed plastic signs, overlays, transfers, labels and acrylic frontpanels for all purposes, in all colors and sizes.

Metal nameplates

Metal nameplates in aluminum, brass or stainless steel with etched finish.

Cable harnessing

Wire and cable harnessing with a wide range of assembly technologies, including macromelt processing. Customized data and network cables as well as uniquely moulded connector solutions.

Design and Innovation Center

Based on a wide range of competencies within technology, materials, and product development, we apply the appropriate technology to meet your needs and secure the entire value chain with design for manufacturing.

Our engineers possess deep technical knowledge and take responsibility from design to development and production of prototypes and for the final production implementation. Through a confidential and open dialogue you are assisted in choosing the right solution to match your specific requirements.

Global supply chain

We use state-of-the-art equipment at our production units in Denmark and Eastern Europe as well as at our partner-based production in Asia. This minimizes costs and maximizes added value for our customers.

Our logistics go hand in hand with customer-specific logistics programs. For example, we manufacture components in Asia for direct delivery to our customers' factory in the same region.

This global setup and network orientation gives you all the advantages of manufacturing – both low and high volumes.

Mekoprint – your global partner

Mekoprint - the perfect match

Customer service

A strong competence in handling global customers makes Mekoprint a professional partner. Our customer service is committed to excellence and offers expert consulting and advice.

Flexibility

Our dynamic organization, including in house Design and Innovation Center, allows us to quickly and professionally adapt our value-adding deliveries to our customers' needs and requirements.

Lean manufacturing

Our global manufacturing setup minimizes costs and maximizes added value for our customers with a focus on LEAN manufacturing. We are LEAN-driven in all internal processes and aim at best practice in all core processes.

Best quality

Our customers can rely on quality assurance in every process, controlled by our ISO 9001, ISO 14001 and OHSAS 18001 certified management system. Products supplied to customers comply to international product standards, e.g. IPC/WHMA-A-620 & IPC-A-610 and UL approval. We support our customers to compliance using internationally known tools as FMEA and PPAP. We supply compliant products to the most demanding industries such as the automotive, medical and defense industries.

Total solutions

A wide range of technologies places Mekoprint as a leading supplier of electronic and mechanical components and solutions. It is our goal to be your preferred global partner in the development of both simple products and complex solutions.
