

Please don't just wash your face with soap, but 'Hovo' on the sketch of your make-up. Cosmetics cannot stand out alone. When you compare it to a film, the combination of skin and vegetable soap can be a supporting character, not a leading role. Although it may not always be made of consistent materials, our continuous efforts will always come first, and we make Hovo soap from specially grown plants.

A combination of materials and skin is needed, and it brings differentiated value to the product by including the vitality of the root.

Hovo Soap Characteristics

It prevents and improves bacterial skin diseases caused by viral fungus equivalency. •• It has no harmful effects on the skin because Hovo soap is chemical-free product and has a mild and anti-bacterial action, making it especially good for bacterial acne, sensitive skin, and baby baths.

Make-up Remover

It is good for cleansing eye shadows or face powder during washing your face. •• Please dip soap bubble into cotton pad and then gently remove your make-up. •• Please take care not to let the foam into your eyes and clean it well with running fresh water to prevent unnecessary irritation. •• Please set your hair under the bubble or with your hair brush. You can spray perfume after setting.

Peeling Cleansing

Please apply and massage the foam evenly over the skin, and then use your finger to massage for about three minutes when applying the scrub peeling. If you use it as a mask pack, apply foam evenly on the face and wash with water after 15 minutes.

Compare the condition of your skin after foam cleansing with after Hovo soap cleansing.
