meditopic®

MARINE DERMATOLOGY

Our company is currently working on several skincare projects in different countries, from single cosmetic formulations to the most advanced dermatological lines.

A strong involvement in the research field of active ingredients for cosmetics is one of our greatest assets. In the laboratory section, a new facility in Barcelona was specially designed to accommodate administrative and manufacturing areas. Inaugurated in 2004, our products are produced in accordance with Good Manufacturing Practices (GMP) and ISO 22716 certified. The laboratory team has over 20 years of experience in the manufacturing of cosmetics and is guarantee of the security we provide our customers.

Our Research and Development (R&D) has a multidisciplinary approach. A cooperation with private biotech companies and public research institutes in Barcelona, the most important biomedical hub in the south of Europe, from medicinal chemistry to bioengineering. To remain at the forefront of new technology allows us to monitor the effectiveness of new raw materials, have the latest active ingredients, advanced delivery systems and, above all, an advanced development platform in terms of safety and toxicity evaluation.

MARINE DERMATOLOGY is the result of advanced and effective technologies in the research of marine biodiversity and the application of molecular biological methods to develop skin care active ingredients and end products with great benefits to consumers.

Protect your skin from excess sugar

It is already known that excess sugar can lead to a variety of health concerns, but what most forget is that too much **sugar can also affect the skin. Skin protein molecules cross-link with sugar molecules and creates AGEs* that cause inflammation in the skin.**

Once formed, AGEs tend to gravitate toward dermal collagen and elastin.

It may result in wrinkling, loss of elasticity, stiffness, accelerated aging and compromised barrier function

Gently apply twice a day over the whole eye contour area, after removal of make up.

30ml e 1.0 fl.oz

Lightweight Day Cream Suitable, specially, for diabetic skin

Proven Antioxidant and Anti-glycation efficacy**

Skin rejuvenation : Lower AGEs levels in 4 weeks

* Advanced Glycation End products

** Active tested in 20 volunteers (31-69 years) in 4 weeks

meditopic[®]

PROFESSIONAL

Radiant and glowing body skin The epitomy of beauty

VitAge[®] is a retinol-based chemical peel that enhances and speeds up the results in the treatment of aging, acne-prone skin, hyperpigmentation and, also, in stretch marks

Retinol is a precursor of retinoic acid
It normalizes keratinization.
Additionally, nourishes the skin,
prevents the appearance of wrinkles,
decreases the depth of existing wrinkles
and improves skin elasticity.

Retinol also reduces spots caused by excessive UV exposure and regulates the proliferation and mobility of melanocytes. It may be combined with other anti-aging, repairing or whitening treatments.

6x2ml e 6.8 fl.oz

6x5ml e 6.8 fl.oz

For professional use only Skin aging, hyperpigmentation, acne-prone skin and anti stretch marks treatments

Chemical peel treatment High concentration of pure retinol and vitamin C

■ DIRECTIONS FOR USE

The treatment should be repeated every week to get the desired effects.
Being autumn the best season to start the treatment.
After applying the product at the practice, face must be washed at home.
Skin usually peels off in the period of 3-4 days

■ CONTRAINDICATIONS

Visible skin damage in the treatment area
Active skin infections (bacterial, fungal, viral)
Active skin inflammation
(such as eczema, urticaria, seborrheic dermatitis, psoriasis)
On-going therapy with isotretinoin
(must wait, at least, 6 months after the end of treatment)
Pregnancy and lactation
