## **Custom-built Material Handling Systems**

### **Get the right advice from the start**

An investment in the logistics functions often has a significant impact and affects the rest of the company.

### **Who are we?**

TRANS-LIFT is a Danish production company.

Family-run business founded 1973. Specialized in electrically engined vehicles to facilitate handling in production, warehouses and order picking.

### **Development**

TRANS-LIFT continuously develops new products for the logistic sector.

We are always aware of the ergonomic as well as the environmental aspect.

The latest TL models all have the benefits of the new A/C technology.

### **Logistics consultants**

Whenever the job requires untraditional solutions we are always available as a serious and competent collaborator.

### **Tailor-made solutions**

TRANS-LIFT provides tailor-made, ergonomic and simple solutions for internal order handling.

For TRANS-LIFT the individual solution is standard.

That's why all vehicles can be delivered in those measures and colours that the customer desires.

### **Spare parts**

All the vehicles are constructed with as few and identical spare parts as possible.

This reduces both maintenance and production costs.

### **Applications**

TRANS-LIFT vehicles can be used for various purposes – in airports, hospitals, railroad stations, warehouses etc.

- Order picking
- Delivery of various goods, mail, laundry, statues etc.
- Handling of luggage
