

From inspiration  
to innovation.

**More makes a difference**  
Combining extra absorbency with skin friendliness

# Incontinence Products

MEGA Disposables S.A. produces a wide range of incontinence products, including pull ups, pads and bedpads. Thanks to the deep knowledge of the category, specialized products have been developed to cover the need for extra absorbing capacity even during night use. All products are designed with skin friendly materials, for extra care to fragile skin. Our company is a licensed manufacturer for the production of the specific medical devices, by the National Organization for Medicines. All our incontinence products bear CE mark.

Innovative product design.  
Superior product quality.  
Exceptional skin friendliness.  
CE certified.

# Pull ups Unisex pants

Extra thin, combine high absorbency, proven Odour Control protection and skin friendly design. With soft breathable topsheet and Oeko-Tex® standard 100 certification for the absence of harmful substances. Specially sealed sides allow easy change. Anatomically shaped. Designed with respect to the environment: contain core with plant fibers, certified by FSC®. In 100% recyclable packaging, produced with 30% recycled material.

# We take the future personally

At MEGA, our self-commitment to Sustainable Development stems from our own principles and values. For this reason, we became pioneers decades ago and we introduced the “sensitive concept”, choosing cotton over plastic as the topsheet of several of our products. Our sensitive products, which are based on friendly materials, both to the skin and the environment, represent a milestone of indisputable value for personal hygiene in Greece and internationally. Because for us, everything begins with the respect we feel towards consumers, our people, our partners and the environment.

Our vision is to have a positive impact on society through sustainability and to promote responsible production and consumption through our activity to ensure a better future for the next generations.

As a Greek industry, but also as one of the largest production units of personal hygiene products in Europe, we are aware of our pivotal role in conserving natural resources and protecting the environment. At the same time, we consider personal care and wellbeing to be inextricably linked to the wellbeing of the planet.

Therefore, we employ both the international and Greek innovative thinking which takes place in our laboratories to introduce the Act Green Redesign – Reduce – Recycle program.

Today, that our planet faces unprecedented environmental challenges, we intensify our efforts. Through the Act Green Program, we put into practice the core element of our DNA, care, while through environmentally beneficial operational practices and initiatives that continually reduce our environmental footprint, we reaffirm our commitment to continue acting responsibly with respect and integrity.

All of us at MEGA, more than ever, offer our know-how, resources and collaborations at the service of the planet while significantly reducing our environmental footprint and at the same time providing improved life quality for our consumers through our products.

# MEGA's Circle of Sustainability

Our products are a result of responsible procedures, recycling systems which reach 100% and a continuous reduction of electricity and water consumption in the production units.

Our products are manufactured in Greece, constantly reducing our environmental footprint from transportations.

Absolute efficiency based on responsible resources, such as renewable wood pulp from sustainable 🌳 forestry.

100% recyclable Sani Sensitive packaging, EveryDay and Babyline Sensitive packaging from >30% recycled material and product redesign to introduce recyclable material wherever it is possible in our portfolio.

Raw materials that are friendly to the skin and the environment.

Continuous reduction of plastic use and replacement with renewable materials of plant origin.

## Sustainability Strategy 2050

### Redesign

We are constantly redesigning our products and processes, we choose certified natural raw materials, aiming at increasing environmental performance at all LCA stages\*.

### Reduce

We are constantly reducing the total volume of packaging materials of our products, the use of plastic, our water footprint, while at the same time we use 100% green energy in our production facilities.

### Recycle

We use 100% recyclable packaging; we are constantly increasing the usage of recycled material and we inform consumers about the benefits of the Circular Economy.

\*Life Cycle Assessment

# Premium quality paired with sustainability

Our mission is to operate with respect to consumers and to the environment by combining the benefits of superior quality and exceptional skin-friendliness, with sustainable production principles and procedures.

Because offering **MORE**  
always matters...
