

The image features two white cosmetic products standing against a light grey background. On the left is a bottle of RAPHAGEN O Recovery Toner with a silver pump dispenser. On the right is a tube of RAPHAGEN O Water Cream. Both products are partially obscured by a lush green plant with small, oval-shaped leaves and thin, yellowish stems that branches out across the foreground. The text 'RAPHAGEN O RECOVERY TONER' is visible on the bottle, and 'RAPHAGEN O WATER CREAM' is visible on the tube. At the top of the tube, there is also Korean text and the volume '50ML / 1.69 fl. oz.'.

- IV. Products Introduction

Introduction of raw materials with RAPHAGEN

RPG-EJN004 (ICID Name : Lactobacillus/Schisandra Seed Extract Ferment Filtrate Extract)

Features and Effects

1. Schisandra is of high quality because it is used as a domestic product.
2. Schisandra Seed Extract is separated/purified from the fermentation process using its own patented lactobacillus to produce a material that is more effective than the Schisandra Extract.
3. RPG-EJN004 has a **high antioxidant effect**.

오미자추출물 및 오미자발효정제물(RPG-EJN004)에 대한 DPPH 측정 결과

DPPH assay confirmed that the antioxidant effect of Schisandra Extract (RPG-OM-E) was 28.2% - 73.3% under 0.5 – 2.0 mg/mL conditions, while the Schisandra Seed Extract (RPG-EJN004) was **77.2% - 98.5%** under 0.5 – 2.0 mg/mL conditions.

This means that **RPG-EJN004 has a higher antioxidant effect** than Schisandra Extract.

[Test Institute : Chemon Non-Clinical Research Institute(2018. 01. 29. ~ 2018. 02. 02.)]

Introduction of raw materials with RAPHAGEN

RPG-EJN004 (ICID Name : Lactobacillus/Schisandra Seed Extract Ferment Filtrate Extract)

4. RPG-EJN004 has a **high whitening effect**.

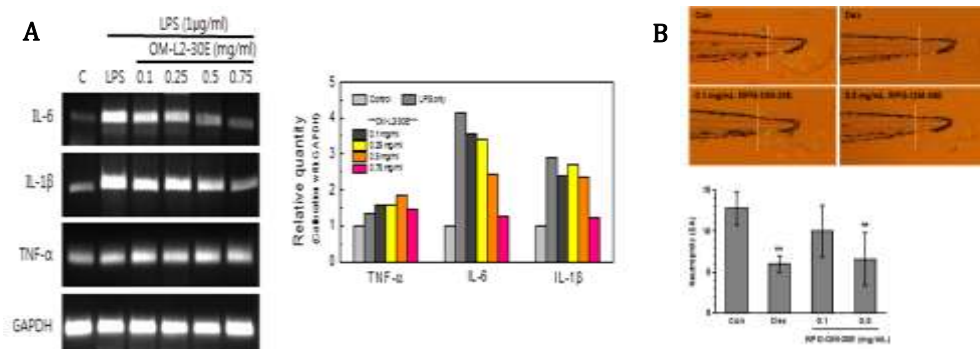

RPG-EJN004에 대한 미백 효능평가 A. HMV-II 세포에서 melanin 함량에 미치는 오미자발효정제물(RPG-EJN004)의 효과, B. 오미자발효정제물(RPG-EJN004)의 tyrosinase 활성에 미치는 효과

Measurement of the decrease in melanin content using HMV-II cells indicates that the decrease in melanin content by 100 $\mu\text{g/mL}$ Schisandra Seed Extract (RPG-EJN004) is about 12%. As a result of inhibiting activity of tyrosinase in cells, melanin was inhibited by Schisandra Seed Extract at concentrations above 500 $\mu\text{g/mL}$.

This means that **Schisandra Seed Extract has whitening effects similar to the whitening functional substance, Albumin (100 μM)**.

[Test Institute : The Korea Research Institute of Chemical Technology (KRICT)]

5. RPG-EJN004 has a **high anti-inflammatory effect**.

RPG-EJN004에 대한 항염증 효능평가 A. 역전사 PCR에 의한 IL-6, IL-1 β , TNF- α 의 발현양 확인, B. 제브라피쉬의 tail-wound 방법을 이용한 오미자발효정제물(RPG-EJN004)의 항염증 효능 시험

The expression volume was reduced by quantifying the expression amount using the Reverse-Translation PCR (RT-PCR) for the inflammatory factors by treating the Schisandra Seed Extract (RPG-EJN004) in RAW264.7 cells that caused inflammation. In addition as a result of measuring the anti-inflammatory effect using zebrafish, Schisandra Seed Extract (RPG-EJN004) showed a significant inhibitory effect at a concentration of 0.5 mg/mL.

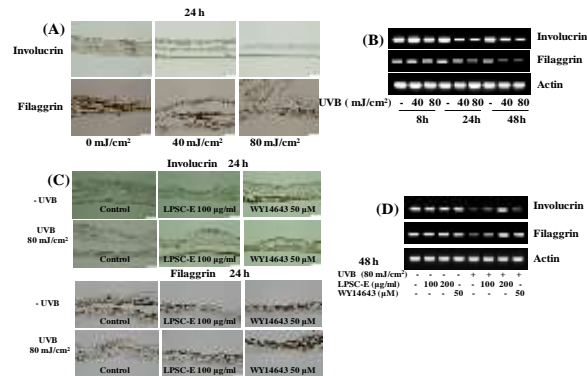

This means that Schisandra Seed Extract (RPG-EJN004) has **high anti-inflammatory effect**.

[Test Institute : The Korea Research Institute of Chemical Technology (KRICT)]

Introduction of raw materials with RAPHAGEN

RPG-EJN004 (ICID Name : Lactobacillus/Schisandra Seed Extract Ferment Filtrate Extract)

6. RPG-EJN004 has a high skin barrier improvement (protection) effect.

인공 피부에서 RPG-EJN004의 피부장벽 개선 효과

To measure the effectiveness of skin barrier improvement (protection), an evaluation was irradiated by applying UVB to artificial skin tissue. Artificial skin tissue not treated with Schisandra Seed Extract decreased UVB irradiation volume and time-dependent involucrin and filaggrin expression. And the artificial skin tissue treated with Schisandra Seed Extract showed the recovery effect of involucrin and filaggrin reduced by UVB. In particular, It was found that of the positive control group WY14643 when processing Schisandra Seed Extract (RPG-EJN004) 200 µg/mL at the mRNA level. This means that **the Schisandra Seed Extract (RPG-EJN004) has good improvement and protection effects** on the skin barrier tissue.

[Test Institute : Keimyung University]

7. RPG-EJN004 has a high skin wrinkle (regeneration) effect.

RPG-EJN004에 의한 피부 주름 개선(재생)에 관한 발현 인자에 대한 평가

After irradiating UVB 60 mJ/cm², It was found that the factors JNKs, c-JUN phosphorylation and expression increased in HaCaT cells that did not treat with the Schisandra Seed Extract (RPG-EJN004). However, in cells treated with the Schisandra Seed Extract (RPG-EJN004 100 µg/mL), the phosphorylation and expression of JNK-1/2 and c-JUN were found to be reduced. This means that Schisandra Seed Extract (RPG-EJN004) has excellent improvement and protection effect on skin wrinkles.

[Test Institute : Keimyung University]

RAPHAGEN O RECOVERY TONER

The Characteristics of RAPHAGEN O RECOVERY TONER

- ✓ Using 'Schisandra Seed Fermentation Extract' on the skin tired from the outside gives skin vitality.
- ✓ It contains ingredients that are good for skin soothing, such as Schisandra seed fermentation extract using lactobacillus, Paeonia Suffruticosa Root extract and Centella Asiatica Extract.
- ✓ It's a viscous type, but it's absorbed quickly, and even if it's applied several times, the skin doesn't feel stuffy.
- ✓ This product is certified through skin wrinkle-related human Clinical trial tests (six types) to help moisturize the skin.
- ✓ This product has been certified through a skin-soothing-related human clinical trial(2 types), it helps to whiten the skin.
- ✓ It is a whitening / wrinkle double functional cosmetic with niacinamide and adenosine.

Subject	Improving skin barrier of the RAPHAGEN O toner and human clinical-trial test to skin soothing effects by external stimuli (chemical stimuli)
Test institute	P&K Skin Research Center
Test Period	2018. 10. 24. ~ 2018. 11. 08.
Purpose	Improving the skin barrier of the RAPHAGEN O toner and evaluate the effect of skin soothing by external stimuli (chemical stimuli).
Selection of test subjects	Those who comply with the following selection criteria 1. Women aged 30 to 55 2. A person who has been delegated by the Tester or the Tester shall be fully informed of the information to the test subjects and voluntarily 3. Healthy person who does not have grade or chronic physical disease including skin disease 4. Those who can observe the trace during the test period
Test result	<p>This study was conducted to evaluate the effects of skin barrier improvement and external stimuli (chemical stimulation) on skin soothing while using "RAPHAGEN O Toner" for 2 weeks in adult women aged 30 to 55 years. After the test, the validity and preference investigation questionnaire were completed.</p> <p>Therefore, the test product "RAPHAGEN O Toner" is considered to be a product that helps skin barrier improvement by improving skin barrier and using external stimuli (chemical stimulation) for 2 weeks.</p>

Results of human Clinical-trial test for RAPHAGEN O RECOVERY TONER

Skin Moisture loss

* 경표피 수분 손실 측정결과 (g/m²h)

✓ Helps to improve skin moisture loss

Results of skin barrier (amount of water loss of light skin)

- As a result of examining the changes in the amount of water loss of the skin after using the test product, the test site was significantly decreased after 1 day and 2 weeks ($p < 0.025$)
- Significantly reduced after 1 day and 2 weeks compared to previous use of areas not applied ($p < 0.05$)
- There was a significant difference between the test site and the not applied area after 2 weeks ($p < 0.05$)

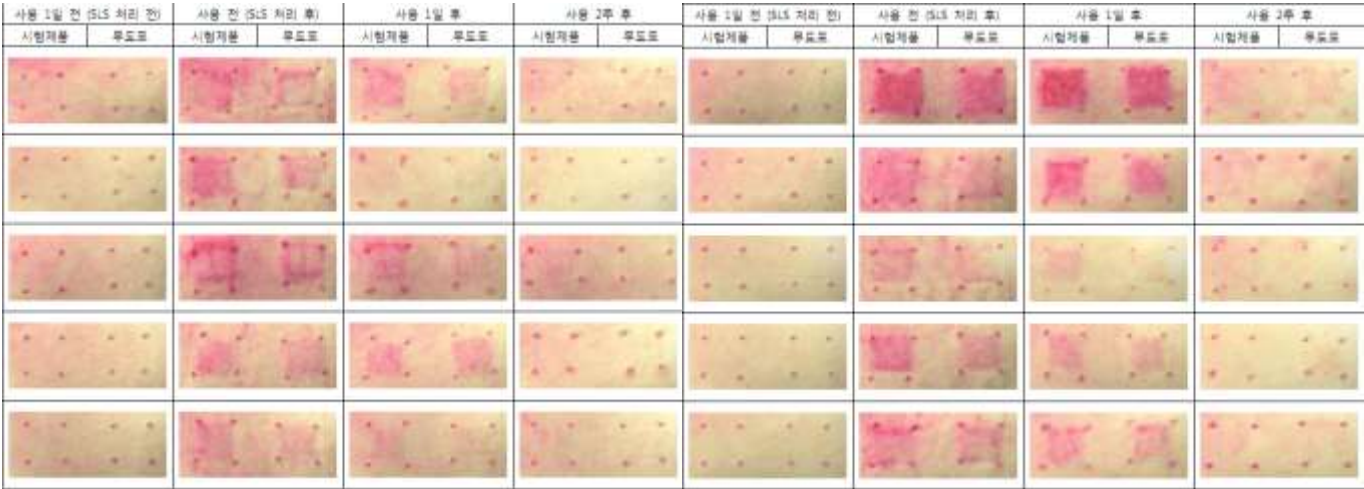

Results of human Clinical-trial test for RAPHAGEN O RECOVERY TONER

skin redness

* 피부 붉은기 측정결과 (g/m²h)

✓ Helps to improve skin redness

Results of skin soothing by external stimuli (chemical stimuli)

- After the use of the test product, changes in the redness of the skin were observed. As a result, the test area is significantly reduced after 2 weeks compared to before use. ($p < 0.05$)
- Significantly reduced after 1 day and 2 weeks compared to previous use of areas not applied ($p < 0.05$)
- There was a significant difference between the test site and the not applied area after 2 weeks ($p < 0.05$)

2018년 12월 11일

Subject	Human Clinical-Trial test for improvement of skin wrinkles, skin pigmentation (freckles / blemish), skin moisturizing holding effect (skin moisturizing, light skin moisture loss), skin elasticity and skin tightness of RAPHAGEN O toner
Test institute	P&K Skin Research Center
Test Period	2018. 10. 24. ~ 2018. 11. 21.
Purpose	To evaluate the effect of toner of RAPHAGEN O toner on the skin wrinkles, skin pigmentation (freckles / blemish), skin moisturizing holding effect (skin moisturizing, light skin moisture loss), skin elasticity and skin tightness.
Selection of test subjects	Those who comply with the following selection criteria 1. Women aged 30 to 55 2. A person who has been delegated by the Tester or the Tester shall be fully informed of the information to the test subjects and voluntarily 3. Healthy person who does not have grade or chronic physical disease including skin disease 4. Those who can observe the trace during the test period
Test result	This study was to evaluate the effects of skin irritation, skin pigmentation (freckles / blemish), skin moisturizing, light skin moisture loss, skin elasticity, And skin density were measured. Therefore, the test product "RAPHAGEN O Toner" is used for 4 weeks to improve the skin wrinkles, skin pigmentation (freckles / blemish), skin moisturizing holding effect (skin moisturizing, light skin moisture loss), skin elasticity, It is judged to be a helpful product.

Results of Skin pigmentation (freckles / blemish)

- After using the test product, it was significantly reduced after 4 weeks of use compared to before use ($p < 0.05$)

Results of skin density

- After using the test product, it was significantly reduced after 4 weeks of use compared to before use ($p < 0.05$)

Results of human Clinical-trial test for RAPHAGEN O RECOVERY TONER

skin moisturizing holding effect

* 피부 개선율 (%)

✓ Helps to skin moisturizing holding (2 types)

피부 치밀도 사진자료

Results of Skin Moisturizing

- After using the test product, it was significantly reduced after 4 weeks of use compared to before use ($p < 0.05$)

Results of Light Skin Moisture Loss

- After using the test product, it was significantly reduced after 4 weeks of use compared to before use ($p < 0.05$)

RAPHAGEN O WATER CREAM

The Characteristics of RAPHAGEN O WATER CREAM

- ✓ Using **Schisandra Seed Fermentation Extract** on the skin tired from the outside gives skin vitality.
- ✓ It contains ingredients that are good for skin moisturizing, such as Schisandra seed fermentation extract using lactobacillus, Macadamia Ternifolia Seed Oil, Limnanthes Alba (Meadowfoam) Seed Oil and Panthenol.
- ✓ For skin moisturizing, it is better to apply to other parts of the body as well as face.
- ✓ It is available for all ages. **And even if you apply it many times, it's less stimulating to your skin.**
- ✓ It is a certified product through human clinical trials (4 types) related to **moisturizing**.
- ✓ It is a certified product through human clinical trials (5 types) related to **whitening**.
- ✓ It's a **whitening cosmetic product** with **Niacinamide**.

2018년 03월 27일

Subject	Human clinical trial for improvement of skin barrier, inside and outside moisturization, and water loss of transepidermal of RAPHAGEN O WATER CREAM
Test institute	P&K Skin Research Center
Test Period	2018. 02. 26. ~ 2018. 03. 14.
Purpose	To evaluate the improve effect of skin barrier, inside and outside moisturization, and moisture loss of transepidermal on RAPHAGEN O WATER CREAM.
Selection of test subjects	Those who comply with the following selection criteria 1. Women aged 20 to 55 2. A person who has been delegated by the Tester or the Tester shall be fully informed of the information to the test subjects and voluntarily 3. Healthy person who does not have grade or chronic physical disease including skin disease 4. Those who can observe the trace during the test period
Test result	This study was conducted to evaluate the effects of skin barrier improvement, inside and outside moisturizing, and water loss of transepidermal on skin moisturizing while using "RAPHAGEN O cream" for 2 weeks in adult women aged 20 to 55 years. After the test, the validity and preference investigation questionnaire were completed. Therefore, the product "RAPHAGEN O WATER Cream" is considered to be a product that helps to improve skin barrier and triple skin moisturizing (skin moisturizing, skin moisturizing, transepidermal moisture loss) by using 2 weeks

2018년 04월 04일

Subject	Human clinical trials on the improvement of the distribution of freckles/blemish in the RAPHAGEN O WATER cream, improvement of the area of freckles, improvement of melanin inside/outside the skin, and improvement of skin brightness (tone).
Test institute	P&K Skin Research Center
Test Period	2018. 02. 19. ~ 2018. 03. 19.
Purpose	To evaluate the effect of RAPHAGEN O WATER cream on the freckles/blemish distribution, the improvement of the freckles area, the improvement of melanin inside/outside the skin and the skin brightness (tone).
Selection of test subjects	Those who comply with the following selection criteria 1. Women aged 30 to 55 2. A person who has been delegated by the Tester or the Tester shall be fully informed of the information to the test subjects and voluntarily 3. Healthy person who does not have grade or chronic physical disease including skin disease 4. Those who can observe the trace during the test period
Test result	This study was performed. For women with spots and freckles of 30 to 55 years old, "RAPHAGEN O WATER Cream" was used for 4 weeks while improving the distribution of freckles/blemish, improvement of freckles area, improvement of melanin in inside/outside the skin and improvement of Skin brightness (tone) After the test, the validity and preference investigation questionnaire were completed. Therefore, The test product "RAPHAGEN O WATER Cream" is used as a product to help improve the skin whitening with the use of 4 weeks (improvement of the freckles/blemish distribution, improvement of the freckles area, improvement of melanin inside/outside the skin and skin brightness).
