

Fabrication of Kaplan runner
Complete assembly,
ready for erection

Machining process of Kaplan blade
and finish Pelton runner different
dimensions till 4,5 diameter

Fabrication and finish
assembly injectors
ready for erection

Francis runners fabricated
in forge and welding
process in three parts

We are a family company with experience of more than 40 years specialize on precision machining. We have experience on hydro market since 30 years. On this moment we can fabricate more than 40 Pelton runners in forge per year and more than 20 Francis runners. We fabricate and complete assemblies ready for erection of injectors, headcover, bottom ring, regulating ring, shaftseal, guide bearing, Kaplan distributors, etc.

Information on the machine list and reference list can be found on our homepage.
