

# SPIRUSIT®

## VITALITY OF STORED SOLAR ENERGY

*Microalgae - rich in proteins, vitamins, minerals and trace elements*

### What is Biosana Spirusit?

The main ingredient of Biosana Spirusit is Spirulina Platensis which is a blue-green microalgae which grows in highly alkaline soda/freshwater lakes. It contains many valuable ingredients which are formed through natural photosynthesis under the hot sun of subtropical climate in Africa, Hawaii and Asia. Because of the high alkalinity (pH 8.5-11) of the water, both the water and Spirulina Platensis are very pure, and the growth of micro-organisms is inhibited. The plants take on the vital sunlight and turn it into valuable, vitamin-rich nutrients. Being enabled by the rich environment in which it grows, Spirulina Platensis has a unique composition which includes:

- 11 different vitamins
- 12 important minerals and trace elements (including 8 essential minerals not produced by the body itself)
- more than 9 amino acids
- essential fatty acids
- Chlorophyll
- Phycozyanin.

The age of Spirulina Platensis is estimated to be about three billion years. The ancient Aztecs consumed these algae as high quality vegetable foods.

### Biosana Spirusit products:

The Biosana Spirusit product range is available in powder form and in tablet form.

### What are the benefits of Biosana Spirusit products?

Modern food cultivation and processing methods often result in the lack of precious nutrients, minerals and vitamins in our diet. Also in today's environment of exposure to increasing pressure and stresses, our need for essential nutrients is increased. We often feel tired, listless or even burned out.

- Spirulina Platensis has the highest protein content of all known foods (65-71%).
- Since all the 8 essential amino acids are contained within the Spirulina Platensis, it is like meat, fish, eggs and soy.
- Biosana Spirusit contains many vitamins required by humans for healthy living.
- Biosana Spirusit contains more iron than any food, is low in sodium, and is suitable for a salt-free diet. The trace elements in Biosana Spirusit include manganese, chromium, zinc, copper, selenium and germanium.
- Biosana Spirusit has been produced using non-invasive production methods and sustainable harvesting.
- It has not been tested on animals, is free from animal ingredients and does not contain genetically modified substances.

For 30 years, the best for your acid-base balance.  
Acid-base Neutrality for your Well-being.  
100% Swiss - Produced with quality, ethics and Conscience
