MADE IN KOREA

LARA CLARA

Through 72-hour
low-temperature aging
& fermentation

Harmful Ingredients OUT
Beneficial Ingredients UP

After fermenting all the ingredients,
natural by-products facilitate
skin penetration, increasing the safe
concentration of effective ingredients
on the skin.

Fermentation And Low-Temperature Aging Method And Application of 3rd generation Nanotechnology

BIO COVER BALM is made using a 72-hour low-temperature aging and fermentation method, incorporating coral and all other ingredients that survive in extreme underwater environments until the end. Through this process, harmful ingredients are reduced, and the concentration of beneficial ingredients for the skin is increased.

Furthermore, the ingredients are micronized to further enhance skin adhesion. This BB cream contains natural active ingredients that help firm the skin, providing a moisturizing and radiant complexion without any tightness.

Strengthening The Skin Barrier

Strengthens damaged skin barrier function using ingredients identical to actual intercellular lipids.

Contains Skin-Friendly Ingredients

- Maximize natural active ingredients to compensate for natural tone with fast absorption
- Smooth texture for excellent applicability and smooth skin expression like peeled eggs

BEFORE & AFTER PHOTOS

(This is a self-test result, there are individual differences)

**Before And After Photos Of Cream
Application On The Pores Beside The Nose**

This BB cream is applied to soothe and protect the skin when irritated after dermatological or laser treatment, or after exposure to ultraviolet rays. It is a safe product that can be used even by people with sensitive skin. Thanks to its excellent spreadability and adherence, it can be applied to acne-prone or troubled skin without any flaking, allowing for comfortable use and convenient daily makeup application.

(Suitable for all skin types including sensitive, acne-prone, oily, and dry skin. It has undergone a hypoallergenic test resulting in 0.00 irritation.)

- BIO COVER BALM is effectively applied by taking a small amount on the upper tip of a puff during application and pressing to spread it out, which helps to refine the skin texture and effectively cover pores

application on acne-prone areas**

New Concept Soothing BB Cream Cushion For The Skin To Breathe

Soothing And Stabilizing The Skin

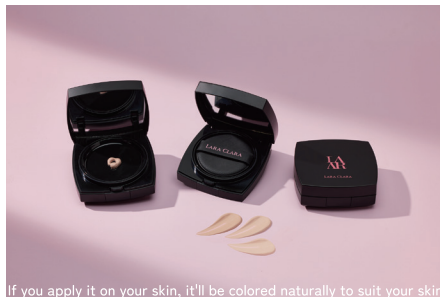

Natural active ingredients through low-temperature aging and fermentation process stabilize and soothe tired skin. It is a new concept BB cream that helps care for damaged skin and creates healthy, elastic skin that allows the skin to breathe. It provides a comfortable feeling of use as if you are not wearing makeup and creates a natural and bright skin.

Provides Skin Nutrition And Strengthens Skin Barriers

Natural antioxidant ingredients make the skin firm, and functional ingredients help improve wrinkles and whiten.

Skin Tone Correction And Darkening Free

As soon as you apply it, it is absorbed into the skin and makes it look more vibrant. It creates a smooth, flawless skin tone and strengthens adhesion to prevent flaking or darkening.

If you apply it on your skin, it'll be colored naturally to suit your skin

3 color options to choose from based on
your desired skin expression

Hygienic airless pumping containers
for sensitive skin

Point1. You can use it with confidence because the air
source is blocked and there is little risk of deterioration.

Point2. There is no cross-contamination by the puff, so
it is less likely to cause problems and is hygienic.

Point3. You can use all of the formulation by raising the
inner plate to the top.

**Pink-based moist glow
formulation with
a naturally radiant**

- #21~22 or #23
- Strengthen skin protection and calming
- Moisturizing skin expression
- Contains sunscreen active ingredients

HOW TO USE

When using for the first time, open the lid of the product and press the upper part of the bottom several times to eject the contents. Take a small amount of the formulation with the provided puff and spread it thinly on the skin. In particular, it is effective in covering pores when applied to the pore area. Apply all over the skin and finish by tapping lightly to ensure it is well absorbed into the skin. After a certain period of time after use, it naturally blends in with your skin tone.

TIPS

If you apply the formulation thinly, you can create a light and natural look on the skin, and the adhesion will also improve. The more thin layers you apply, the higher the coverage. (A full make-up look is possible.)

[COMPLEMENTARY PRODUCT]

TIPS FOR EXTREMELY DRY SKIN

For dry skin, when using the slightly less moist [Light Beige] color, apply [LARA CLARA EXO-AG HEMP MIST SERUM] right before make-up to maintain a beautiful skin texture without flaking all day.
