

Company

It is a 100% safety certified cosmetic that uses high quality ingredients and passes the skin hypoallergenic test. It has been certified as a safe cosmetic.

To make healthy products, Ayul is based on science and innovation technology thoroughly. Select only safe and good ingredients that are good for your skin to make the most effective product for your skin.

From manufacturing to the post-production process, Ayul considers how nature is healthy and sustainable. We use recyclable materials to do little by little what we can do today for future generations.
