Balls

We specialise in the supply of steel balls for the industry. Since 2009 we are an authorised distributor of the largest manufacturer of bearing ball in Poland - Tsubaki-Hoover Ponad Sp. z o.o.

Balls made of chrome steel are used mainly for bearings and many other industrial applications.

Their characteristic feature is smooth surface, high hardness and they are able to carry high loadings thanks to new through hardening technology. The best quality steel is used for balls production coming only from verified source that meets high quality requirements. Manufacturing balls with strictly defined tolerance, surface precision and repeatable quality is guaranteed by statistical process control (SPC) introduced for all production process.

GUMET supply steel balls of any diameter, in different grades and materials.

DIAMETER		DIAMETER		DIAMETER		DIAMETER	
inch	mm	inch	mm	inch	mm	inch	mm
5/32	3,969	15/32	11,906	29/32	23,019	1"7/8	47,625

We offer balls:

- chrome steel (bearing)
- stainless steel
- S2 tool steel
- for ball mills

Now we wide the range of materials:

- ceramic
- glass
- phenolic resins
- plastic balls

We invite you to cooperate with us!
